

OPEN LAKE TECHNOLOGY

SUPERVISION, USAGE AND IT COMPLIANCE
FOR YOUR UNIFIED COMMUNICATIONS
(UCAAS)

YOUR REQUIREMENT

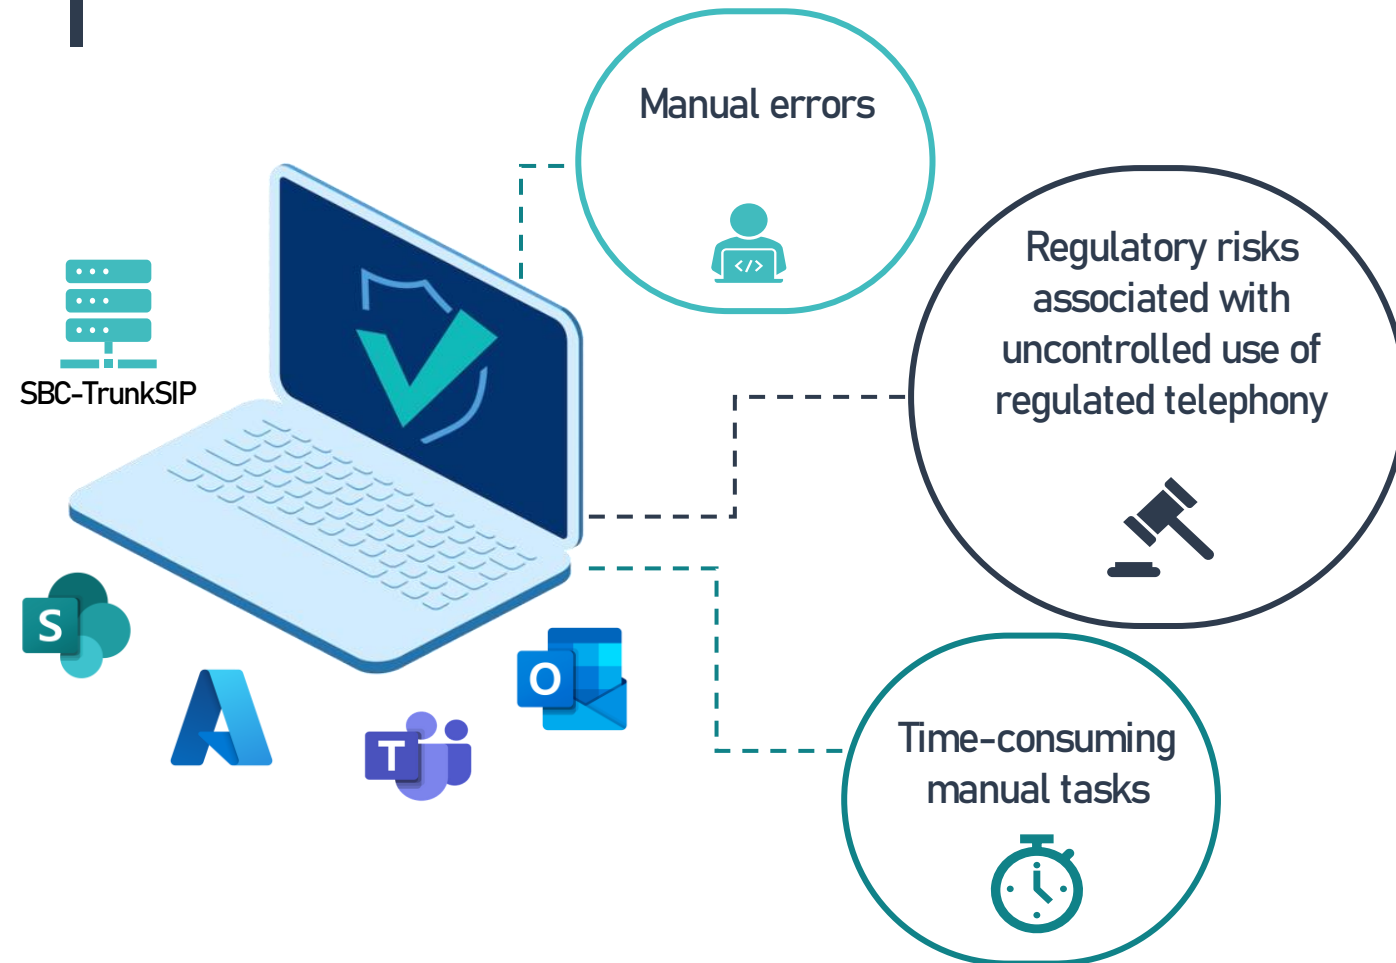

Automate your IT monitoring and compliance management tasks for your UcaaS telephony

Understanding your teams' adoption of unified telephony (Teams, etc.)

Through an agnostic, near-real-time software suite, in private or public SaaS mode

WHY?

Clouds, local regulations, all-IP and home working are having a major impact on your IT teams and their processes.

CUSTOMER CASE STUDIES - Asset Manager*

Complex needs, simple, central solution

Description: This customer has global coverage based on Microsoft TEAMS

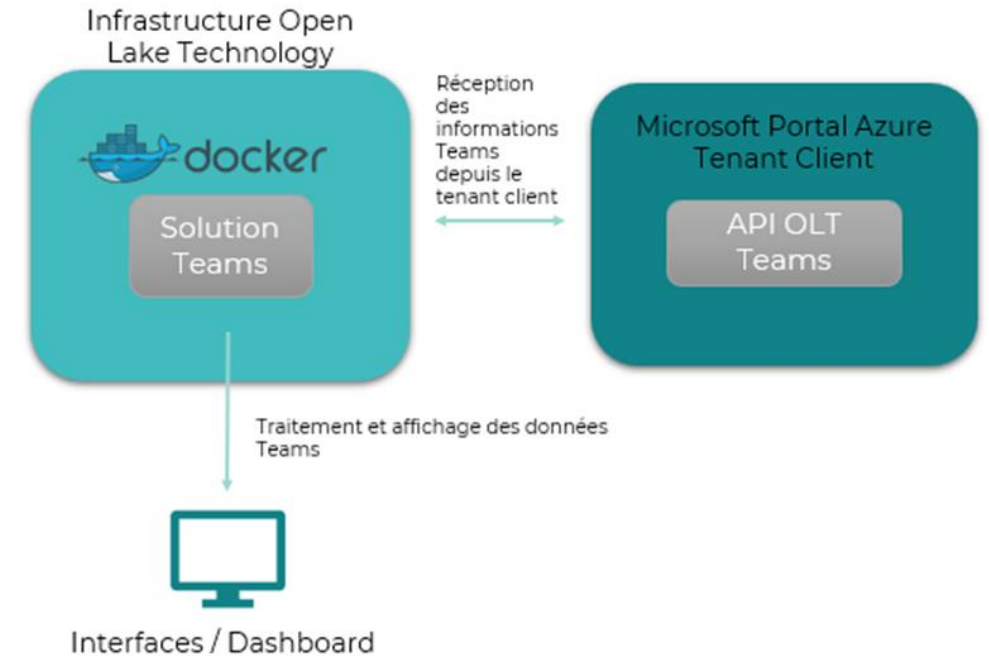

It uses direct routing, Meeting TEAMS Rooms, local office, an in-house IT contact center and a VIP contact center for private banking customers.

Issue: The lack of a management tool for fine-tuning usage and incident management, as well as IT compliance (recordings), quickly became apparent.

Features appreciated by customer :

- Visibility on reception quality (queues), meeting rooms usage/licences
- Near-real-time usage, supervision and alarm in the event of incidents (equipment, voice quality, licenses, etc.).
- IT Compliance management dedicated to Microsoft TEAMS (multi-channel recorders)...
- Complete traceability of incident
- End-to-end solution security

Project architecture :

"An indispensable solution for the daily monitoring of our collaboration and IT compliance services."

G.F., Global Head Of Infrastructure

ITOI for your UCAAS

Management of incident sources
