# **SQL Server Migration: 10 Day Implementation**

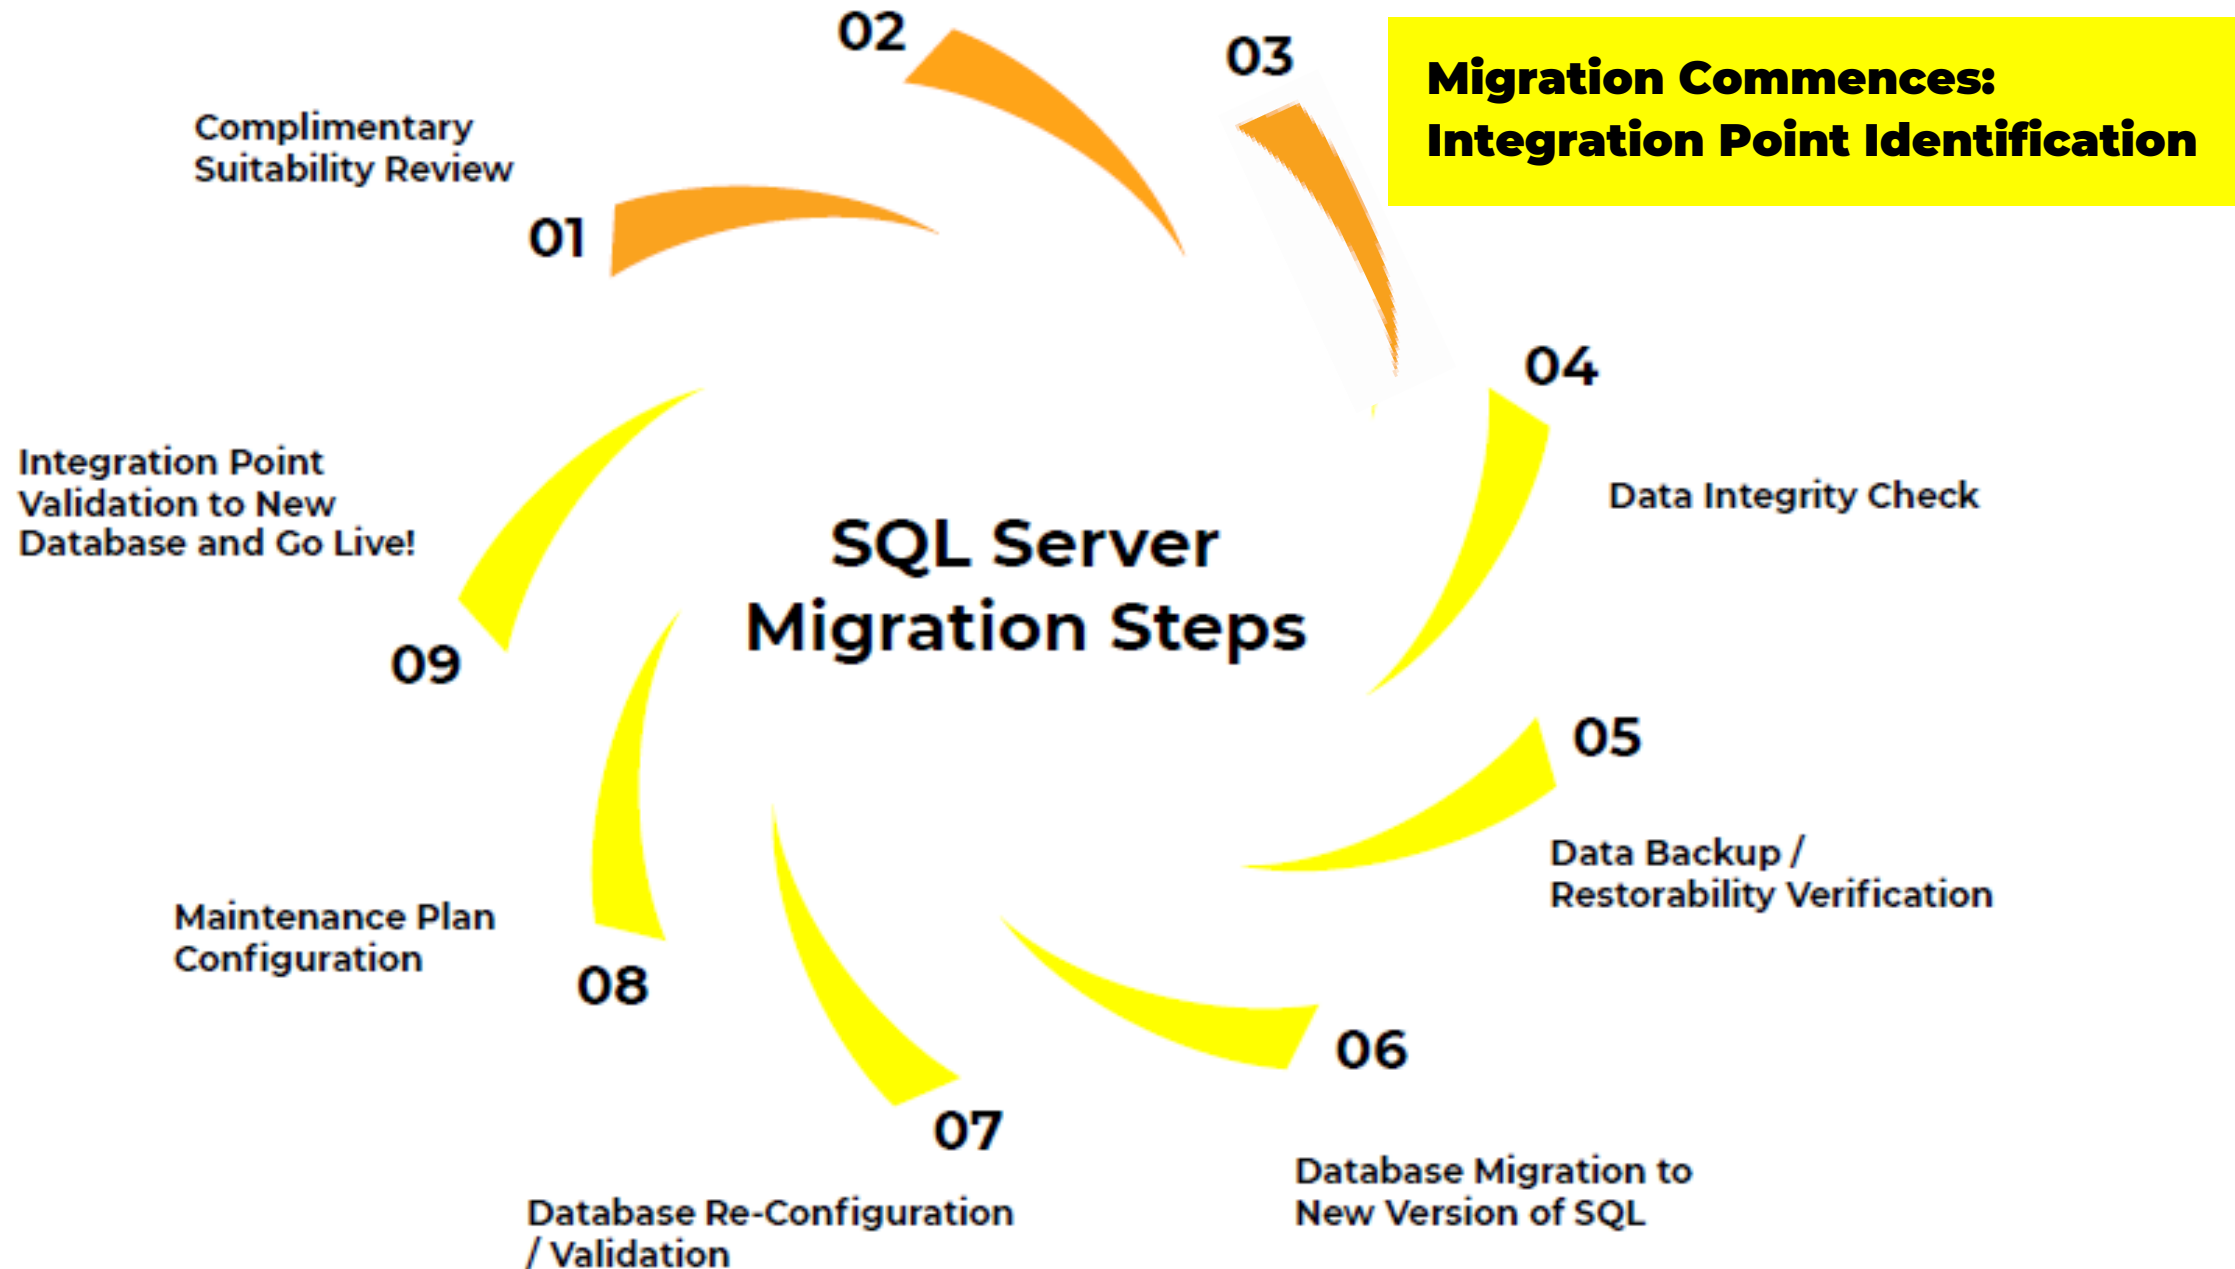

# SQL Server Migration: 10 Day Implementation

This 7-10 day migration implementation is the continuation of the 1-Day Technical Analysis, where we migrate your servers, apps, databases and workloads to Microsoft's SQL as a Service on Azure Cloud.

Following the completion of a Technical Analysis which assesses your business requirements & current configuration, we commence the Migration plan as follows;

- Integration Point Identification
- Data Integrity Check
- Database Backup / Restorability Verification
- Database Migration to New Version of SQL
- Database Reconfiguration / Validation
- Maintenance Plan Configuration
- Integration Point Validation to New Database & Go Live!

SQL Migration Configuration Assessment:  
1-Day Technical Review
