# Maximizing Impact

*A Strategic Approach to Healthcare Platform Selection*

At Vervint, we are more than a technology consulting firm; we are the architects of healthcare's digital future. Our expertise lies in crafting tailor-made digital solutions that advance patient care and streamline provider workflows. Our mission is precise: to elevate health outcomes through innovation.
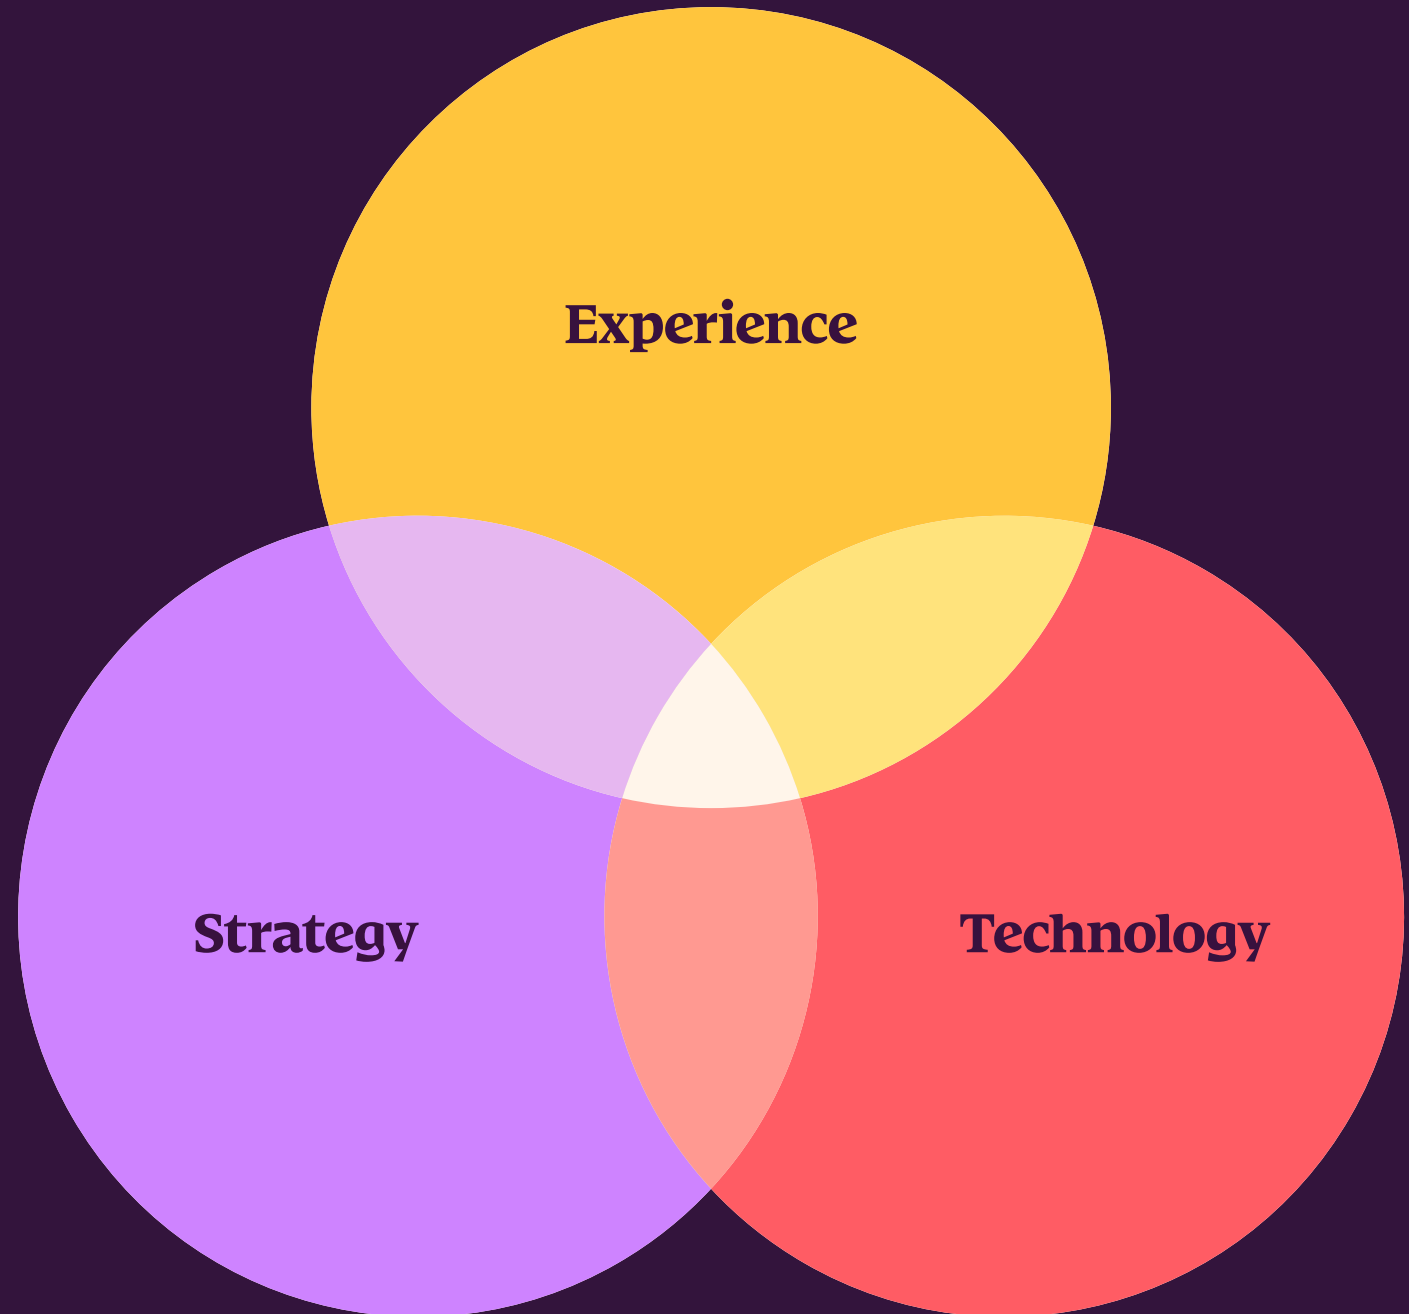

We meticulously design and engineer digital products, construct robust infrastructures, and demystify the complexities of the digital transformation in healthcare. By putting people at the center of our work—patients, providers, and partners—we harness human creativity to forge technology that delivers lasting value and ushers in a new era of positive disruption in healthcare.

We are committed to the belief that through the symbiosis of human ingenuity and cutting-edge technology, we can revolutionize healthcare for the betterment of all.

# We thrive in the messy middle.

Our formula is simple: we are deliberately human. We work with people, empowering them and their organization with purpose.

Technology continues to evolve. Business continues to pivot. But our unique ability to thrive at the intersection of strategy, technology, and experience helps companies change for the better.

Experience

Strategy

Technology

Perform discovery, design, development, and support services

Pull together cross-functional project teams from our expert in-house resources

Collaborate closely with client resources — product owners, etc.

Establish a clear, objectives-based project cadence

Establish governance elements within overall program to ensure strategic direction

# Iterate through milestone-driven engagements.

# We Put People at the Heart of Healthcare

### Deliver Measurable Results

We focus on delivering tangible improvements in patient outcomes, efficiencies, and bottom-line performance.

### Extensive Expertise

We've worked with healthcare organizations for over 20 years to modernize and transform outdated systems and processes into innovative tools that improve lives and empower progress.

### Holistic Approach

Our approach combines strategy, technology, and user experience to achieve the best outcomes for everyone.

Healthcare platform optimization isn't just about technology.

It's about empowering your organization to achieve its goals and navigate complexities with purpose.

# Start Building Your Healthcare Platform Strategy

The path to platform optimization extends far beyond cloud vs. on-prem decisions.

We craft a holistic strategy that meets your current and future needs, helping you confidently navigate challenges and lay a strong foundation for growth.

# Make the right choice for you.

**On-Prem Solutions**

**Cloud Infrastructure**

**Hybrid Model**

We'll help you invest in the best healthcare platform to meet current and future goals.

# Healthcare Platform Assessment

We'll conduct a review of your technology goals, assess your current technology platform state, and provide actionable insight and strategic roadmap to make the choices that will support organizational goals.

**With our roadmap, you'll have what you need to move forward with confidence.**

## What We Offer

- A **review and assessment** of how your current state aligns with your organizational goals.

- A **picture** of your ideal future state.

- A **strategic roadmap** to get you there.

## What It Means for You

- Order of Magnitude Cost Projection

- Confident Decision-Making

- Investment Protection

- Accelerated Transformation

- Foundation for Success

# What to Expect

## WEEK ❶

### We'll Lay the Foundation for Success

- Conduct executive, clinical, and technical stakeholder interviews.
- Inventory existing tech platforms

## WEEK ❷

### Together, We'll Craft Your Strategy

- Facilitate an onsite immersive strategy workshop.
- Synthesize workshop insights and develop a comprehensive strategy.
- Estimate costs of technology platform, implementation, and management.

## WEEK ❸

### We'll Empower You With Deliverables

- Receive your customized strategy, roadmap, and cost projection that aligns with business objectives, needs, and capabilities.
- Get detailed insights, along with actionable recommendations to address them.

*Cost: $60,000*

## Deaconess

Deaconess Health is a premier healthcare provider with a network of 20 hospitals throughout Indiana, Illinois, and Kentucky.

**Learn More →**

### CHALLENGE

Deaconess needed a reliable disaster recovery solution for their two data centers in the same geographic area.

### PROCESS

We assessed Deaconess's environment, prioritizing those applications and processes essential to functional DR.

### SOLUTION

We architected an Azure-based Disaster Recovery solution for Deaconess's Epic environment to reduce risk, increase disaster readiness, and reduce costs.

### RESULTS

During a disaster, Deaconess' systems will remain functional, and health services will stay online thanks to our hybrid solutions, DR implementation, and managed services.

**MEMORIAL HOSPITAL**
And Health Care Center

Memorial Hospital has provided excellent care to the people of Jasper, Indiana for over 70 years.

**Learn More →**

### CHALLENGE

**Memorial Hospital wanted to implement Epic EHR software to streamline healthcare and improve patient care.**

### COMPLICATION

**The plan to build an on-prem Epic data center supported by a cloud-based Azure disaster recovery system was jeopardized by pandemic-related supply chain issues.**

### SOLUTION

**We quickly pivoted to a cloud-based hosting system, enabling the hospital to keep the project moving forward.**

### RESULTS

**Our proprietary foundational architecture for Epic on Azure streamlined implementation and made up for lost time due to hardware delays.**
