Maximizing Impact: A Strategic Approach to Healthcare Platform Selection

Healthcare platform optimization isn't just about technology — it's about empowering your organization to achieve its goals and navigate complexities with purpose. At Vervint, we know the path to platform optimization extends far beyond cloud vs. on-prem decisions. Since every healthcare organization has unique goals, platform selection and implementation should align with your objectives.

That's why, when it comes time to evaluate and decide which solution is best for you, we offer a healthcare platform assessment and strategy engagement that goes beyond cloud evaluation. We focus on crafting a holistic strategy that meets your current and future needs. Whether it's leveraging the cloud, on-prem infrastructure, or a hybrid model, we'll help you confidently navigate challenges and lay a strong foundation for growth.

Impact for You

Our team will thoroughly analyze your current platform state, organizational capabilities, and requirements to identify opportunities for strategic platform changes that align with your goals. We will recommend transformation options and adoption strategies for clinical platforms such as EHR systems like Epic. With our roadmap, you'll receive everything you need to move forward with confidence.

Accelerated Transformation

Framework for Success

⭐ *Outcome of Assessment*

We'll develop a healthcare technology roadmap to maximize impact aligned with your unique goals.

Why vervint.

We put people at the heart of every solution, and that's no different when it comes to healthcare. We focus on delivering measurable results, guaranteeing tangible improvements in patient outcomes, efficiencies, and bottom-line performance. With over 20 years of healthcare experience, our team delivers tailored solutions, backed by our trusted Microsoft partnership, to meet your needs. Our approach treats healthcare technology platforms as an asset for you to generate cost savings and drive strategic growth.

Healthcare Platform Strategy Scope

Our healthcare platform strategy assessment will provide you with a framework for running, migrating, and optimizing critical workloads like your EHR or surrounding application ecosystem. Here's what we will bring you:

WEEK ❶

We'll Lay the Foundation for Success

- Summary of findings, recommendations, and proposed solution(s) with value and feasibility.

- Mock-ups of data visualization and analytics showcasing POC usage.

- High-level data architecture design, data models, and integration strategies.

WEEK ❷

Together, We'll Craft Your Strategy

- Facilitate an onsite immersive strategy workshop.

- Synthesize workshop insights and develop a comprehensive strategy deliverable.

- Technology platform, implementation, and management cost estimation.

WEEK ❸

We'll Empower You with Deliverables

- Receive your customized strategy, roadmap, and cost projection that aligns with business objectives, needs, and capabilities.

- Get detailed insights, along with actionable recommendations to address them.

Our Solution in Action

See how we help healthcare organizations ensure patient care — even when disaster strikes.

▼ *Challenge*

Deaconess Health realized that having two data centers in a single geographic area made it vulnerable to system disruption in the event of a disaster.

▶ *Solution*

We assessed Deaconess' current state and created an Azure-based Disaster Recovery solution for their Epic environment to reduce risk, increase disaster readiness, and reduce the cost of their disaster recovery infrastructure.

While Deaconess hopes disaster situations are rare, their systems will remain functional, and health services will stay online thanks to our hybrid solutions, DR implementation, and managed services.
