

## OpsHub and infiNetix Implement Azure DevOps Migration in Tight Timelines and Zero Downtime

### Overview

infiNetix, our client, specializes in delivering high-end information technology services, and improving business processes. Based in Annapolis, MD, they provide IT & Consulting services to help their customers implement and scale their operations and technologies. One of their customers wanted to move/migrate their data from Commercial Cloud to Government Cloud, which required migration between Azure DevOps organizations. infiNetix chose OpsHub Azure DevOps Migrator (OADOM) to help its client ease their migration journey.

### The Challenges

- ➔ Choosing a migration strategy that could migrate data to a different tenant/ environment without disrupting team productivity
- ➔ Preserving historical data work items, including links, history, comments, and attachments while migrating to the new environment
- ➔ Time crunch: The client wanted the migration to be completed within a short period of time

# Timely and Complete Migration with Zero Data Loss

OpsHub Azure DevOps Migrator (OADOM) enabled a full fidelity migration with zero data loss, transitioning seamlessly from one Azure DevOps organization to another Azure DevOps organization.

The partnership with OpsHub helped infiNetix accomplish the migration goals for their client on time, within budget and without disrupting their business continuity.

## Engagement Benefits

- ➔ Data consolidation from multiple ADO sources
- ➔ Preservation of mission critical data (both historical and current data)
- ➔ Intuitive, automated, and UI-based migration
- ➔ Ability for teams to be productive without downtime or disruption
- ➔ Smooth switchover and operational continuity with on-time migration
- ➔ Post migration, the OpsHub Professional Services (PS) team helped reconcile old user accounts to the new user account in the target system

## Client testimonial

“OpsHub saved the day for us. With continuous support from OpsHub, we were able to complete the migration for our client on time. The whole experience of collaborating with OpsHub was great. The team investigated the issues for us. Also, logging was highly detailed, and the team always had answers to what migrated and what didn't. Installing OADOM and connecting the two environments was easy, facilitating the migration journey. I would 100 % recommend OpsHub to anyone.”
