

Relievox AI: Where Care Meets Intelligence – CDS, Medical Scribe & Coding

relievox.ai by Optimoz Inc.

SUMMARY

Relievox AI is a cutting-edge, AI-powered clinical decision support system, providing far more than just advanced note-taking capabilities. As a comprehensive suite, Relievox AI seamlessly delivers real-time documentation assistance for clinicians across all specialties and practice settings. Purpose-built to integrate effortlessly into diverse clinical workflows, Relievox AI automates and optimizes notetaking, transcription, coding, and data entry, consistently outperforming manual scribing in speed, accuracy, and compliance. By leveraging robust decision support tools, Relievox-AI empowers providers to make informed clinical decisions while significantly reducing administrative burdens, ultimately enabling clinicians to devote more attention to delivering high-quality patient care.

KEY CAPABILITIES & VALUE PROPOSITION

- **Real-Time Documentation**
 - Accurately captures patient encounters through high-quality audio recording on mobile or desktop.
 - Instantly transcribes conversations and generates structured notes (SOAP, DDx, H&P, Progress, Consultation, Procedure, Discharge, and more).
 - Adapts to over 20+ clinical documentation formats and custom note styles.
- **Comprehensive Data Entry**
 - Documents history of present illness, review of systems, physical exam, diagnostic assessment, and plan of care per provider direction.
 - Records laboratory and radiographic results, prescription refills, orders for labs/procedures, and billing details as instructed.
 - Supports direct EMR connectivity, including export to EPIC and other major systems.
- **Medical Coding & Summarization**
 - Extracts CPT and ICD-10 codes automatically from transcripts for accurate billing and compliance.
 - Provides concise AI-generated summaries for efficient review.
- **Seamless Workflow Integration**
 - Offers both mobile and desktop portals for flexible, cross-platform access.
 - Enables auto-send to EMRs or manual export of professionally formatted PDF reports.
 - Maintains full security and HIPAA compliance.
- **Intuitive & Non-Disruptive**
 - Ambiance mode allows recording while device is hidden, supporting natural clinician-patient interaction.
 - Minimal interface keeps the focus on patient care, not technology.
- **Clinical Decision Support using HIPAA Compliant AI**
 - Differential Diagnosis using History of Present Illness or Past Encounters
 - AI Chat with patients' clinical history for smarter care

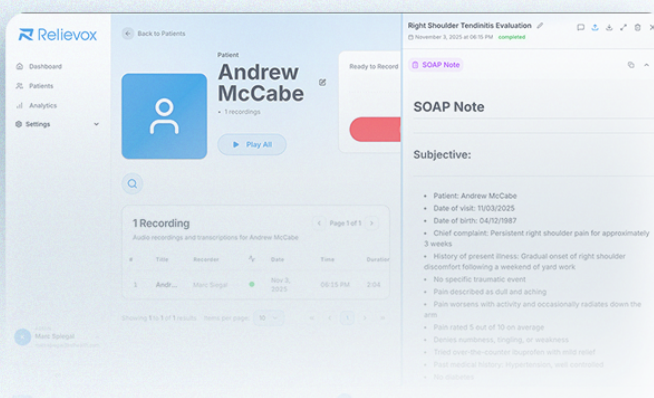

HIGHLIGHTS

- Reduces provider documentation time, increasing face-to-face care.
- Minimizes errors and maximizes accuracy in medical records.
- Instantly available, 24/7, with no turnover or training required.
- Designed for quick onboarding and seamless integration into any clinical workflow.

Relievox is the next-generation AI medical scribe, reliable, efficient, and always ready to deliver superior documentation for providers.

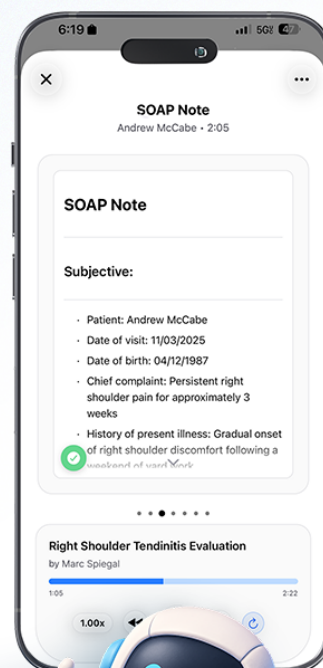

Stop wasting hours on **documentation.**

Relievox
handles documentation,
so you can focus on patients.
