# Accelerate the migration of your on-prem server fleet to Microsoft Azure

The Azure Migrate Consulting Service tackles the challenges customers encounter during their on-premises migration to the Microsoft Azure cloud. This comprehensive service provides tailored strategies and solutions to ensure cost reduction, accelerated migration, enhanced security, and improved business continuity.

## CHALLENGES

Infrastructure and network connectivity.

Extending your datacenter to the cloud (i.e: DNS name resolution)

Azure Migrate project design

Fleet discovery and assessment

Uncertain migration and running costs

## IDEAL SOLUTION

A design based on the Cloud Adoption Framework that sets a solid foundation for our cloud infrastructure.

A solid understand of your server fleet and the challenges per-server to perform a migration.

Understanding the migration effort costs, as well as the Azure costs for compute, network and storage.

## DESIRED OUTCOMES

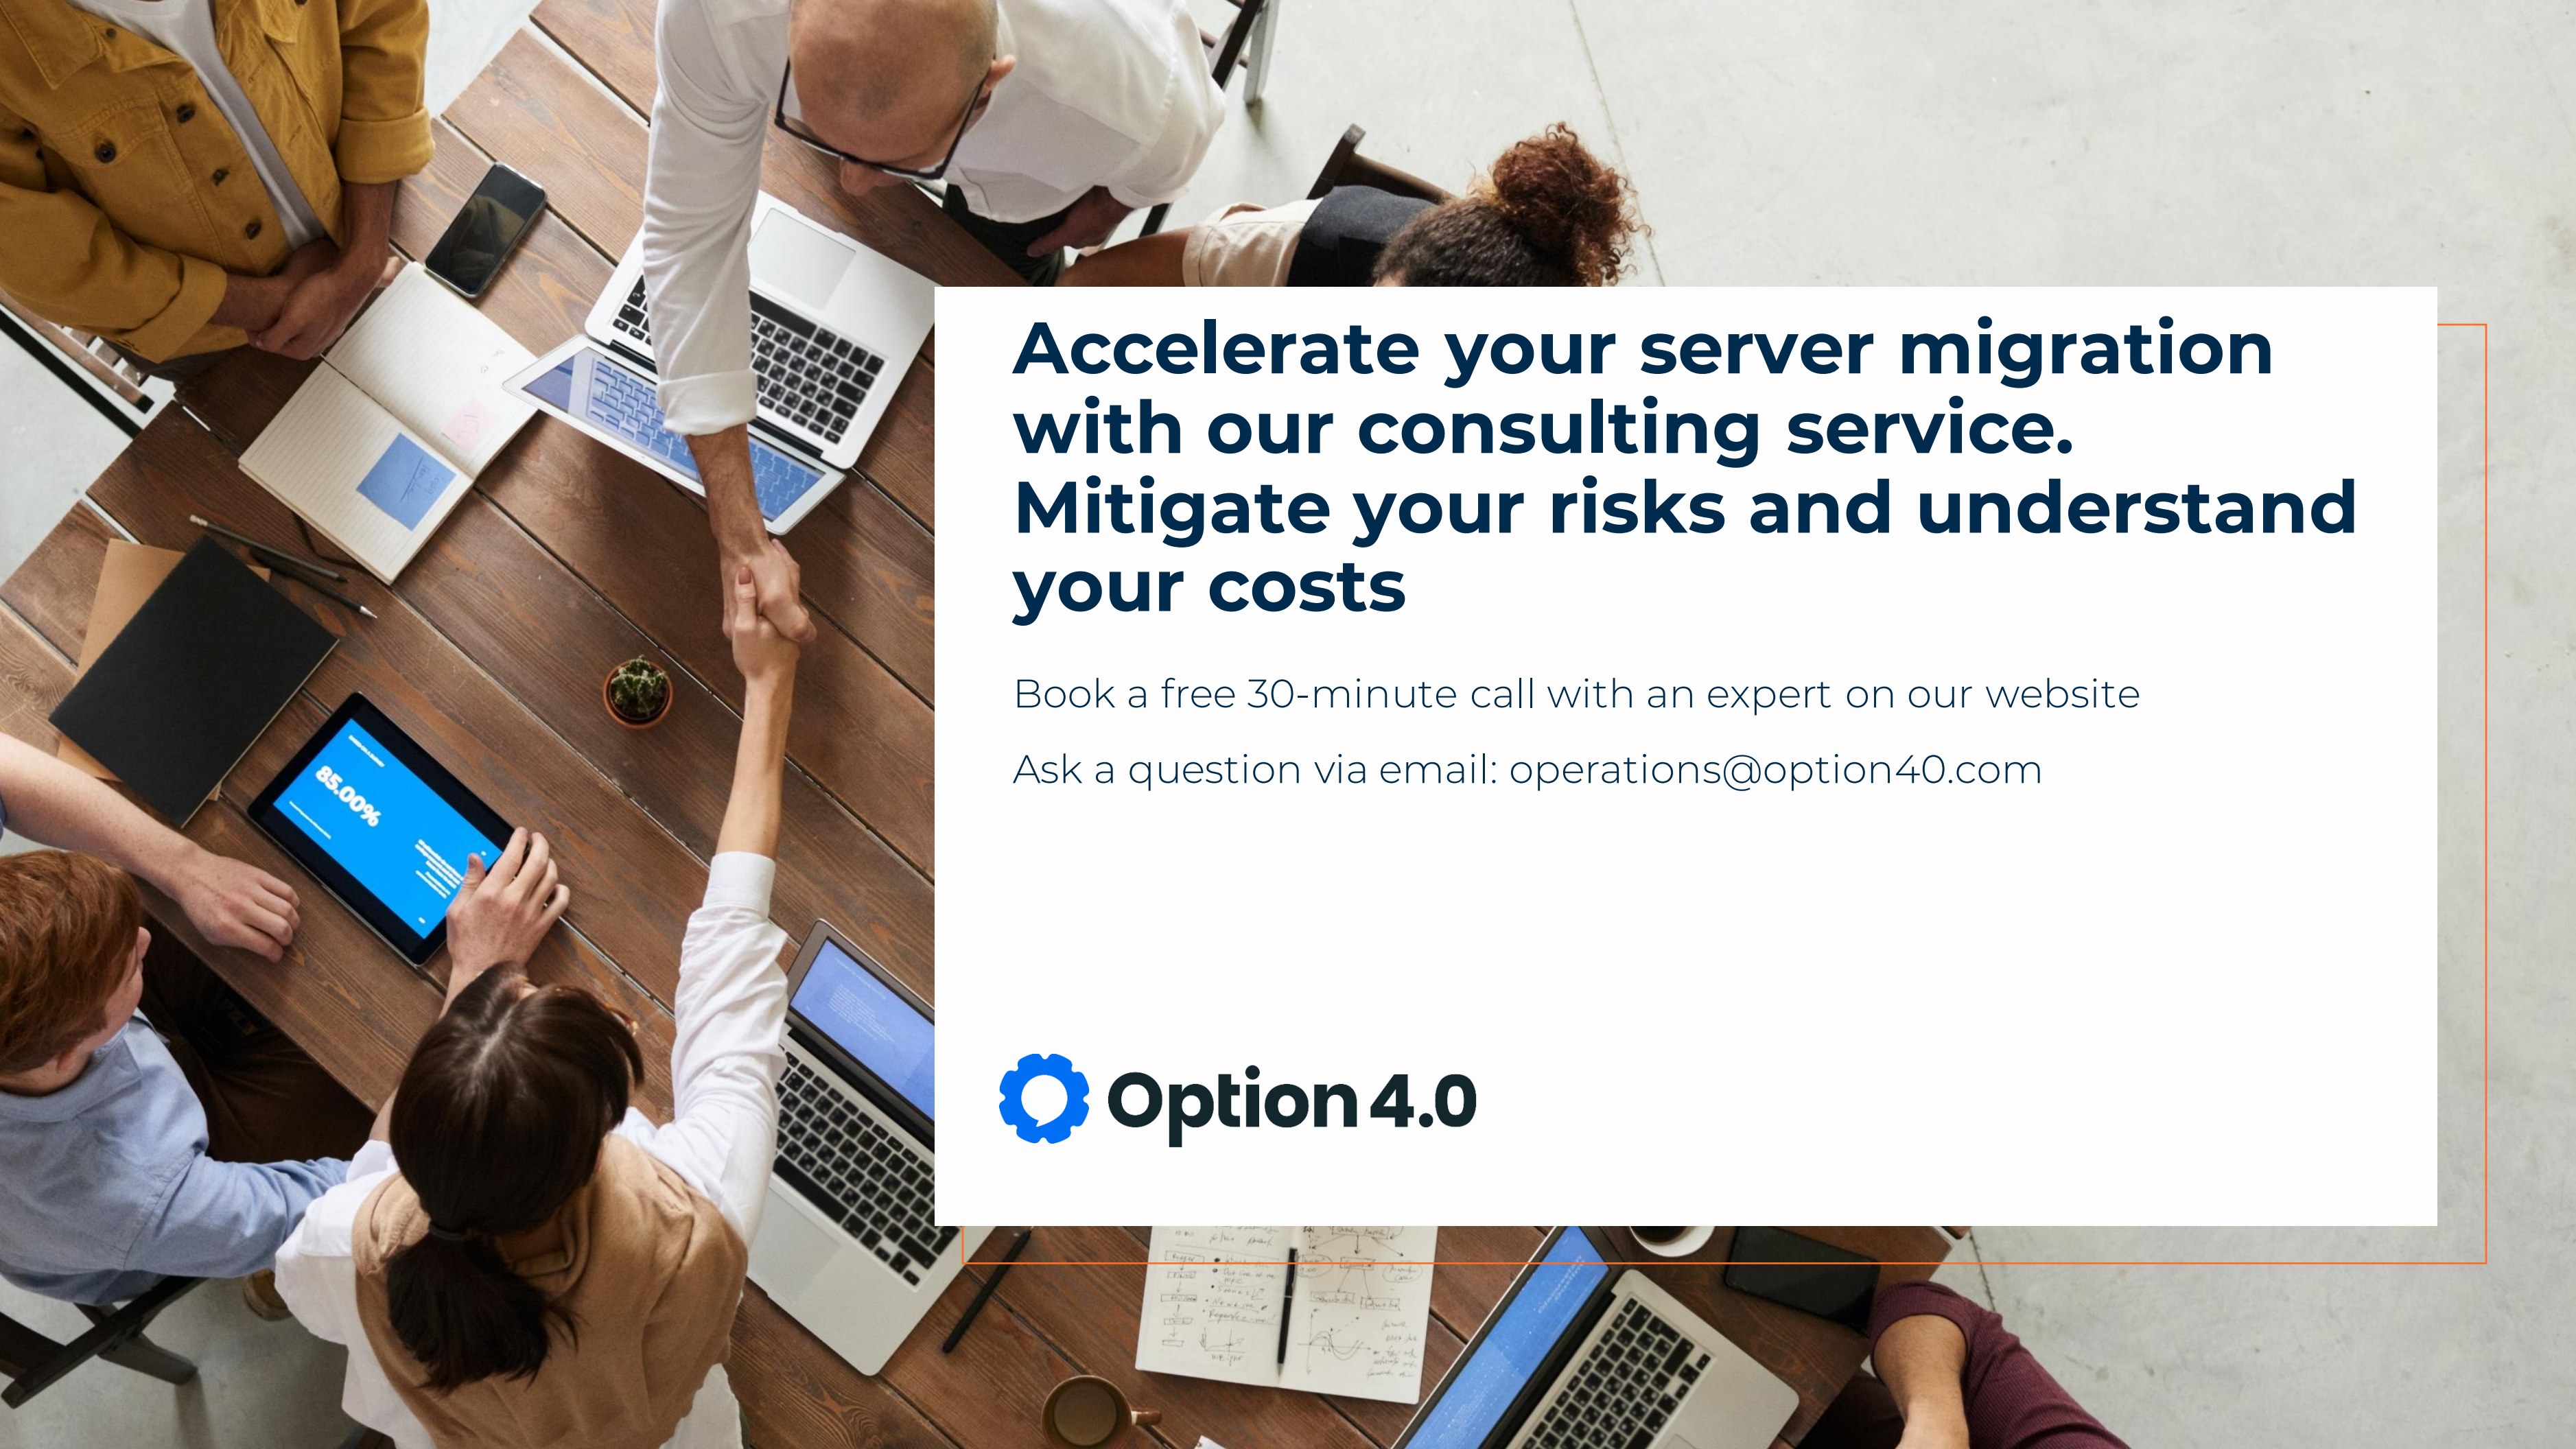

Architecture for the migration.

Assessment and Discovery

Migration strategy that reduces risk

Understanding of the costs.

# Accelerate your server migration with our consulting service. Mitigate your risks and understand your costs
