

# the digital building platform of tomorrow

oqdo.bos is a digital building platform to **integrate, optimize and operate all your buildings** into one platform.

Subscribe for News

Request a demo

Cloud operated. Works on macOS, Windows & any mobile device.

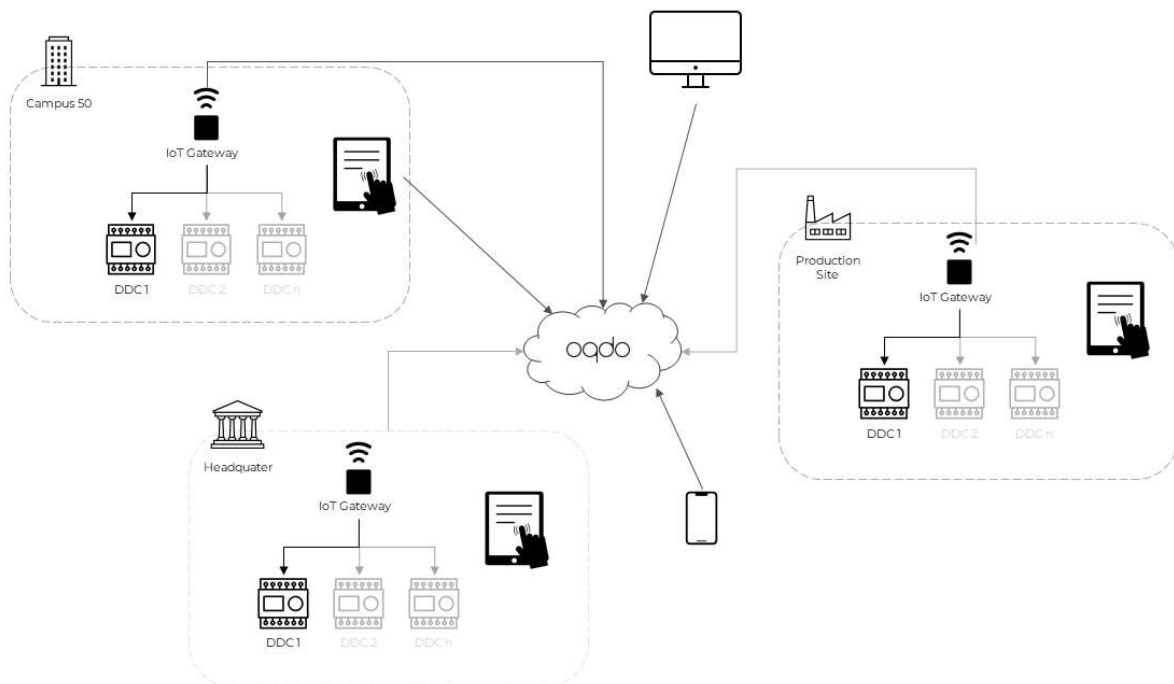

# Do it the comfortable way

oqdo.bos is both vastly **functional** and extremely **simple**.

## CONNECT EVERY BUILDING

Hundreds of buildings, millions of square meters of all your offices, labs and production sites or just a single heating system. All of them are connected to one.

## REDUCE WASTE OF ENERGY

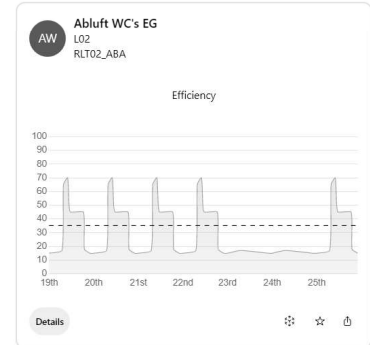

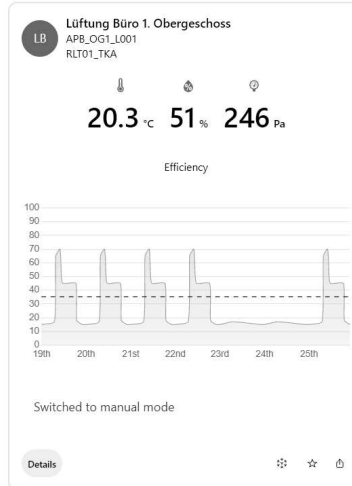

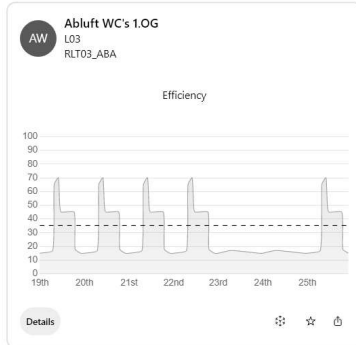

Benchmark energy spendings, optimize space utilization at scale.

# Dashboards

your favorites in one place

+ Important Rooms Supply **Air Handling Units** Campus 50

## PERFECTION IN OPERATION

Operate your buildings, do/plan maintenance, optimize your service dispatching, see if something really important is wrong.

## Alarms

Acknowledge All

A list of all alarms and events in your facility ordered by new alarms first, gone alarms second and acknowledged ones at last

Search...

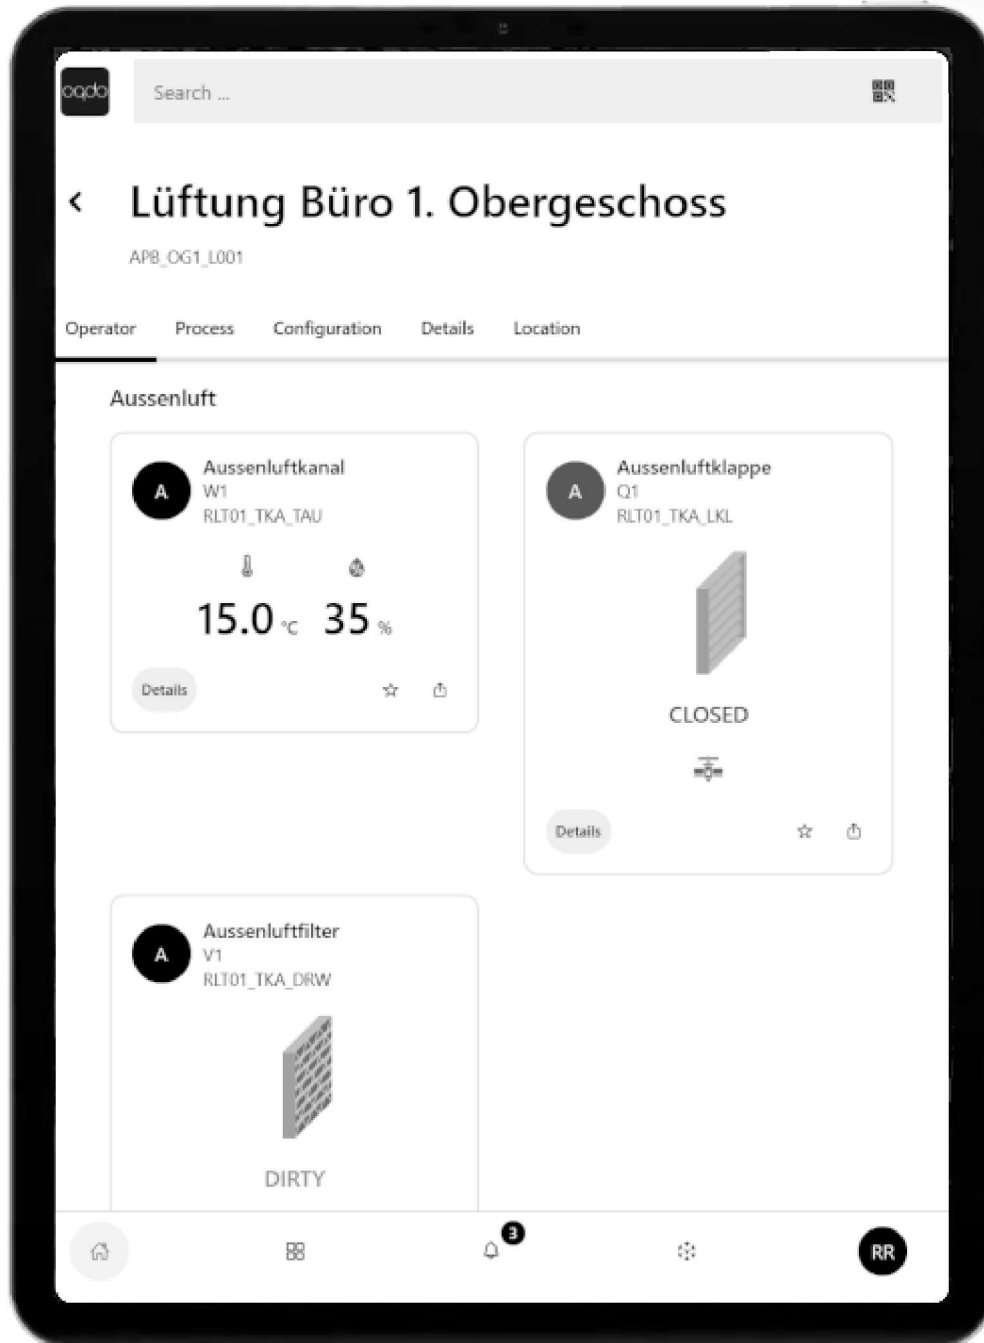

-  Hebeanlage Störung | Alarm  
FD3 3 hours ago Acknowledge >
-  Temperatur oben | Value 21 < low limit undefined  
B1 5 days ago >
-  Lüftung Büro 1. Obergeschoss | Switched to manual mode

### WORK ANYWHERE

Use wherever is the most suitable for you, on any device. oqdo.bos is there when you need it.

English usGB

#### DIFFERENT PERSPECTIVES

Look at your assets from different perspectives e.g. a process view to see how things are related.

## See the whole picture

Combine **all systems** like Lighting, Security, HVAC and Energy into **one**.

English usGB

#### **THE ORTHOGONAL WAY**

We combine and aggregate telemetry with a building ontology of all the different functions like lighting, security, energy, HVAC etc. So that your mental model of how you think about all of these is the same as our digital world.

#### **A BETTER INFORMATION BASE**

Keep track of the alarms that really count. Dispatch your service more efficiently and do your maintenance work on a better information basis.

#### **COMISSIONING**

When it comes to bringing your buildings onboard there is one thing you need: easy & fast comissioning at scale.

**Improve your daily work**

English usGB

Whether its **one Building** or a **variety of properties** —  
oqdo.bos has got it covered.

NEW

## Dashboards

Organize your assets as you need them.

NEW

## Process view

See how your assets are connected from a process perspective. This can help you determine the impact of an alarm more quickly.

## Efficiency Tracking

Easily **compare** the efficiency of your facilities.

## QR Codes

Use QR Codes to easily **locate and identify** your assets.

## Themes

Automatically switches to dark theme at night.  
Your eyes will love it.

## Alarm Managment

English usGB

Integrated learning alarm management will help you recognize and solve the **issues that really count**.

## **BACnet inside**

Onboarding your BACnet devices has never been that easy.

COMING SOON

## **BIM**

Integrate your **Bulding Information Models** and connect them to your assets to gain more insights.

COMING SOON

## **Ticketing**

Manage tasks, maintenance works or trouble tickets and keep track of your progress by creating useful tickets.

## **Easy to start with**

There are two things you need to get started. An IoT Edge Gateway and a Device Subscription.

## IoT Edge Gateway

€500

once

Gateway to connect up to 10 BACnet Devices. Installed on premise.

[Get it](#)

## Device

€50

/month

One single BACnet Device (DDC) securely connected and managed by oqdo.bos including free updates.

[Get it](#)

English usGB

## User

€8  
/month

User to access all the basic  
functionality of oqdo.bos.
