Benefits of a Go-To-Azure strategy

Business

Capability & Flexibility

- Elastic and flexible, real-time scaling to meet business demands
- Access to latest and greatest technology
- Pay per use, low idle / waste

Sustainability

- Better Power Usage Effectiveness (PUE) ratio
- Renewable and carbon free energy

Resilience & Disaster Recovery

- Global reach & coverage
- Geographics separation and redundancy

Agility & Innovation

- Faster speed to market
- Opens new use cases not possible or cost prohibitive on-premise, e.g. Data Hub, Consumer IoT
- Democratize access to technology

The cloud journey is not easy

Moving to a public cloud is complex

Identifying Applications

Identifying of those applications best suited to reap the benefits of migration to the cloud

Modernizing for Cloud

Is the application ready for cloud or does it need re-architecting or modernization

Estimating Complexity

Determining the complexity and level of effort involved in migrating to the cloud

Resolving Dependencies

Identifying and resolving dependencies of other applications, hardware, integration, network etc.

Migrating at scale

Planning the migration to achieve results at scale without disruptions to business

Setting up required capabilities

Identify and set up the right capabilities in house to manage the new environment

5 service offers to support you

in the digital | applications transformation of your IT

IT 360

All the expertise you need to manage and develop your IT

- Urbanization 2.0
- IT mapping

IT Management

The expertise you need to modernize your IT services

- IT Service Management
- Digital Network

IT Masters

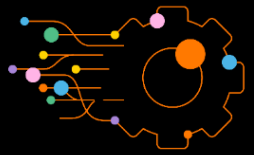
Technical and methodological expertise at the service of your projects (training, coaching, support, assessments)

- Agility
- XOps (Dev, Sec, Fin, No)
- Ecodesign Applications
- UX Design
- Accessibility

Applications Boost

All the expertise you need to build and modernise your applications

- CNApps & hyperscalers
- Mobile Apps test



Critical IT

All specific certified expertise for sensitive and defense projects

8 challenges of IT department
and Orange Business expertise

IT mapping, Architecture, cost optimisation, risk management

A legacy managed and mastered

Agility, scrum, DevOps, tooling, API, Time to market

Adopt the best strategy for every change

Automation, testings, QoS, IT service management, AIOps

Performance and quality of service

EcoDesign of apps, digital sobriety, accessibility

Embrase EcoDesign methodology

Safety and Regulations

GDPR, standards, application security, sovereignty, Trusted cloud,

Manage the costs

Cloud, automation, GreenOps, FinOps

Innovate with all the heads of …

Blockchain, Metaverse, AI, Quantum computing, etc... Innovation, MVP, UX Design, Time to Market

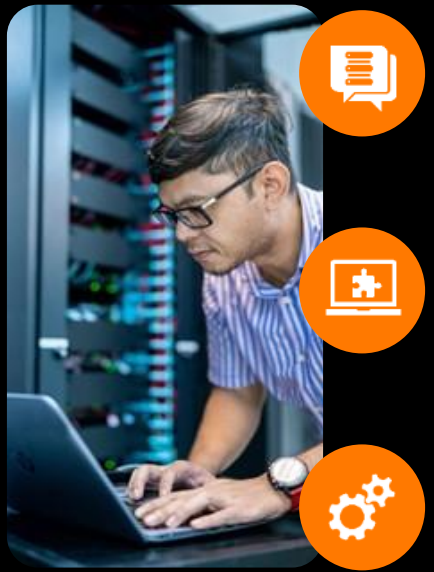
Open your IT and inter connect several platforms

API Management, E-bonding, container, complexity management

orange Business

Cloud Native Apps Development

Accelerate your digital transformation with an application development expert and innovative cloud solutions



Analyse & proposal

- Assessment, audits, cloud service approach, transformation, roadmap, consulting & expertise
- New service projects, or apps modernisation following a move to Azure migration

Realise and bring to life

- Agile design, DevOps, MVP
- Tailored made development and adaptation of your service architecture (microservices, serverless etc.)
- Integration, automation and testing

Development and applications factory

- Fixed price or commitment
- Dedicated team, in collaboration with your teams
- Large expertise : Devops, Product Owners, agility, management, design, test
