

OT Network Discovery and Assessment

Get full knowledge of your network

Target audience
Network Manager
Head of OT Infrastructure

Why do you need it ?

- Accelerate OT network problem resolution, decreasing production downtime.
- Better security risk understanding, through enhanced visibility.
- Accurate Network Device Inventory for Risk Assessment
- To get an updated Network Documentation

Scope and deliverables

- Detailed Network topology (L1,L2 to L3) diagrams
- Network Inventory and OS level
- Recommendations for optimization

Benefits

Minimize production downtimes caused by network problems.
Enhance efficiency in network operation and management.
Lower network operation costs.
Identify areas for improvement.
Establish a baseline for future risk assessments.

What can OB provide ?

- Conduct a comprehensive network discovery tailored for OT environments, employing a non-intrusive methodology and suitable tools. This involves identifying all network components like routers, switches, firewalls, WLCs, APs, and IoT gateways.

- OT Network Manager
- Solution Consultant (Orange)
- FOIS

- Network tools
- Onsite visits

- Accurate Network documentation

Duration / Pricing

- Small to medium network approx. 10 to 25 Man Days
- Large networks require effort estimation
