

M365 Modern Workplace – Pilot

The next step to more productivity

You want to learn what to do to participate of the benefits of Modern Workplace in your specific environment? Orange Networks can help you achieve this goal with you personal M365 Pilot.

Piloting Windows 10 + Office 365 + EMS

In your personal M365 Pilot Orange Networks helps you to leverage all the benefits of a Microsoft based workplace. Our well skilled staff supports you in modifying the Standard M365 to suit your company the best.

Why customers do a M365 Pilot

- Every environment is unique
- Find difficulties early and save money
- A pilot results in a blueprint for a migration

Personalized Pilot

- See how the products behave in your unique environment
- Save stress and money in the migration
- Only beneficial features are used

Get your personal Pilot.

Blueprint your migration

- Respond to difficulties early
- Get a Blueprint for your migration = Save money and time during migration

Save time and money.

Get better user satisfaction

- Users know best how they work and what they need
- Involve users early reduces resistance to changes

Get the best user acceptance.

Implementation of a Windows 10 client at a worldwide 28000 users environment. Migration of the existing Windows 7 client. Configuration of the existing SCCM Current Branch environment. Creating Windows 10 Servicing to automate updates. Planning the roll out of the new devices. Helping OSRAM to reduce the time they need to manage their SCCM and Windows clients. Develop together better processes to keep the environment clean and on high performance.

- OSRAM, Windows 10 Implementation, OSRAM Licht AG
