

Power Platform Coachings by ORBIS

Get to know the Power Platform to digitize existing processes, use your data efficiently and replace your existing solutions in a sustainable way

In our "Power Platform by ORBIS" series, we offer virtual coaching sessions where you can gain initial experience and results with the Power Platform after receiving guidance. No specific programming knowledge is required to participate in this offering.

We offer the following coachings based on the "App in a Day" format:

Power Apps

Power BI

Power Automate

Governance & Security

Take advantage of our Power Platform Coachings to develop solutions that are relevant to your business. These coachings can be booked individually, combined thematically or can build on each other. We will be happy to advise you on your selection.

A detailed agenda is available upon request. The agenda can be individually adapted to your needs.

Power Apps Coaching by ORBIS

Do you want to digitize your existing processes or develop business solutions for your department with the help of the Power Platform? But lack the necessary skills to complete your Power Platform solution?

In our modular ORBIS Power Platform coaching sessions, you will learn the basics of the Power Platform to get from an idea to a finished and managed solution in no time.

Coaching topics:

Get a general overview of the Power Platform application areas and benefits. At the end of the workshop, you will be able to:

- Create a tablet application for your end users
- Extend the database to store and manage data
- Implement automated email approval processes
- Generate rich visuals based on your application data
- Add a smart touch to your app

Who should attend?

- Business managers with a technical interest
- Business departments that have a need for digitization
- Business analyst
- IT in-house consultants
- Developers
- Business development and digitization officers
