

Guest Insights & Governance

Gain control over Microsoft 365 Guest Access and collaborate effectively without compromising the security of your organization.

Get to know the Guests in your tenant. Intimately.

**Know everything you need to know about
Guests** by requiring Workspace Owners to capture additional information, including company name, contact details, manager, profile picture, and even location, before making approval decisions.

New Guest

This workspace type requires that new guests be approved before being added to the workspace. Once the profile is created and the request submitted, a notification will be sent to the policy approver.

Mike Johnson (Guest from Deloitte)

Cancel

Confirm & Add

Get the scoop on all the Guests within your tenant, and find out who they are, who invited them, who approved their access, and what information they have access to.

Empower Workspace Owners to **manage** Guests effectively

Give Workspace Owners the power to see all guests within a Team, understand their current status, and request new Guests through an intuitive but controlled process.

 **Guest Request**
Approval Required

 **PRJ_EXT-Guest Management Feedback**
Team

The following workspace requires newly added guest (external) users **be approved before being granted access**. Please review the associated guests and determine their eligibility for access.

Guests Requested: 3

Approve or reject requested guests
Orchestry App

 **Orchestry Service App [dev-azure] added you to...** 9:55 AM

Assign periodical Guest reviews to Workspace owners or a group of users to ensure access can be revoked if it's no longer required.

Cut IT administrative hours by giving Team Owners the ability to perform self-service actions like removing guests from their Workspace or even resending invitation emails.

Compliance **Made Easy** with Orchestra's Guest Management

Configure

Configure Orchestra's Workspace templates with Guest Policies to require Guest approvals before access is granted, or restrict Guest access entirely, to ensure most sensitive information is protected with the added layer of security.

Capture

Capture additional information about users beyond the standard Microsoft 365 requirements, including a profile picture, company name, contact details, manager name, and location to satisfy industry-specific compliance requirements.

Implement

Implement and enforce a custom-fit Guest review process based on the organization's needs to ensure compliance and reduce security risks and issues.

Get ahead of Microsoft 365 **security** and **data leaks** issues.

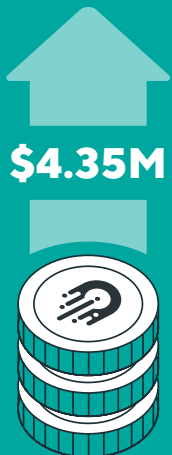

Use proactive controls to avoid potential security risks associated with unmanaged guests, reduce likelihood of data leaks and breaches.

By gathering additional information on Guests, including profile picture, contact details, and company names, you can avoid incorrect adding of Guests to resources.

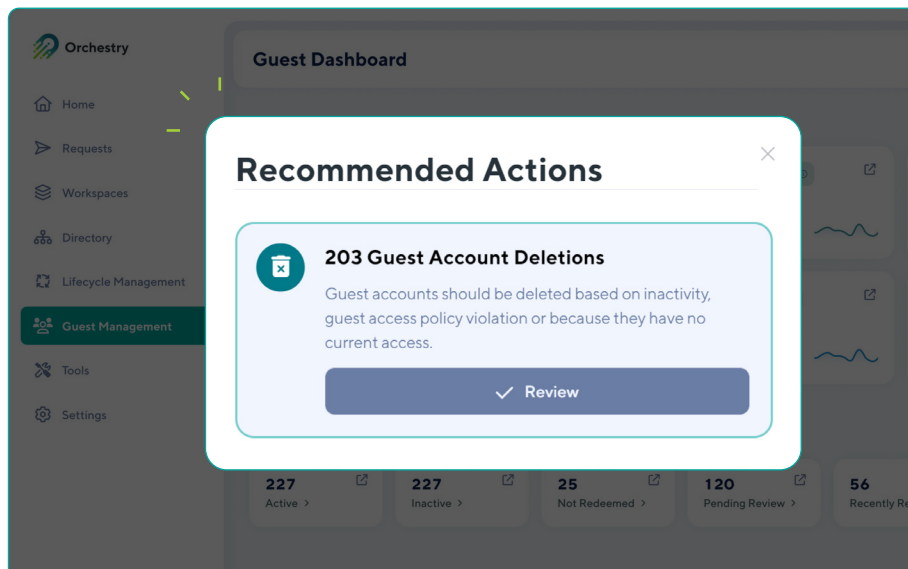

Leverage Orchestry's intelligent Guest Insights to make informed decisions on which Guests need to be removed from Azure AD.

Orchestry
users save
on average
USD\$4.35M*
by avoiding
security
breaches and
data leaks.

Guest Management beyond standard Microsoft 365 capabilities

Functionality	 Orchestry	 Microsoft 365
Rich Guest dashboard and insights which provides a powerful set of reports on all guests, their access, and their current status		 Limited, requires scripting & significant permissions
Flexible Guest Review policies to proactively keep on top of guest access over time		 Guest "access-reviews" are included as part of Azure AD Premium P2 (costly additional license)
Flexible Guest Request policies to ensure guests can only be requested where appropriate, and are only added once an approval has taken place		 Limited
Intelligent recommended actions to help identify problematic or 'forgotten' Guest users		 Limited
Enforce the capture of additional guest metadata to improve what is known about external users		 Not Available without costly manual intervention or customizations
Empower Team Owners to manage guests within their Workspaces		 Limited
Enforce Guest settings and Policies as part of a robust and flexible templating engine		 Limited

Try Orchestry today

Enjoy the full Orchestry experience for 28 days.
