No Viva Connections

You do not have Viva Connections deployed to your Teams environment.

Best Practice

Microsoft 365 is **challenging** out of the box

For too long, Microsoft 365 administrators have grappled with the complexities of managing, governing, and securing their environments. Without a unified solution, they've been left in the dark, relying on scattered reports and guesswork.

The result? Uncertainty about what needs to be done and when. **It's time for a change.**

INTRODUCING

Orchestry Recommendations

Orchestry Recommendations is your beacon of clarity in the complex world of Microsoft 365, guiding your decision-making like a team of experts and anticipating challenges before they arise.

The screenshot displays the Orchestry Recommendations dashboard. On the left is a navigation sidebar with sections: Home, Signals, Recommendations, Health Checks, Provision, Template, Workspaces, Channels, Documents, Features, Approved W, Metadata, Analyze, Dashboards, Reports, and Automate. The main content area is titled 'Signals Recommendations' and shows a summary of 'Total Workspaces Scanned: 1,345'. It includes filters for 'Open' (5), 'Resolved' (4), and 'Snoozed' (2). A 'Priority' section shows a donut chart with counts for Urgent (1), Important (3), and Best Practice (1). A 'Resolved' section shows 8 items with a 23% increase over the last 30 days. A 'New' section shows 12 items. A 'Top Categories' table lists: Security (25), Adoption (17), Guests (6), Architecture (22), Cost Saving (14), and Communications (-). Three recommendation cards are shown: 'Large Audience for Shared Links in OneDrive' (Important), 'Workspaces Without Guest Review Policies' (Urgent), and 'Unusual OneDrive Deletion Activity' (Important). Callouts highlight 'AI Readiness' and 'Security'. A 'Governance' badge is at the bottom left. Microsoft 365 icons are scattered around the interface.

How do OrchestrY Recommendations work?

OrchestrY Recommendations is a data-driven solution that provides instant insights into your M365 environment. It focuses on:

 AI Readiness

 Management

 Governance

 Adoption

 Security

OrchestrY gathers historical and current data from various Microsoft 365 APIs and instantly produces intelligent recommendations:

OrchestrY Recommendations

Microsoft Teams

Channel info, App usage, and interactions

SharePoint

Lists, Libraries, Pages, Hub Site Configuration, and more

M365 Reports

Historical usage data for Exchange, OneDrive, and apps

M365 Audit Logs

Events related to link sharing, permissions, and more

Licensing Info

License availability, assignments, and redundancies

Guest Info

Access, creation, status, and permissions

Address issues proactively, implement best practices and future-proof your environment.

Proactive Precision

Orchestry Recommendations provides dynamic insights, sparing you from tedious data analysis. With the ability to analyze historical data and trends, it proactively identifies issues **BEFORE** they impact your M365 environment, letting you invest your time where it matters most.

Urgent

Tenant Near Storage Quota

Your recent growth of **10 TB per month** will exceed your Tenant Quota within **3 months**

\$ Cost Savings

Take action to resolve

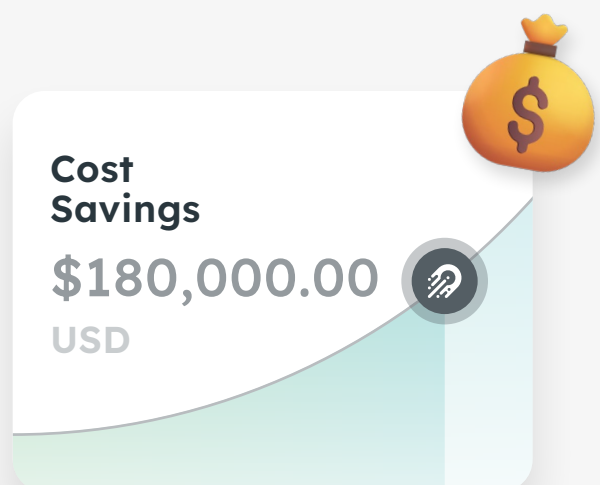

Intelligent recommendations beyond standard Microsoft 365 capabilities.

Functionality		
Centralized Insights and Recommendations across Microsoft 365	✓	Not Available
Data driven best practice suggestions specific to your tenant	✓	Not Available
Proactive & predictive recommendations based on usage patterns and trends	✓	Not Available
Single consolidated list of recommendations for multiple M365 workloads including Entra ID, SharePoint, Teams, Defender and others	✓	Not Available
Constantly evolving recommendations based on data and Microsoft 365 expertise	✓	Not Available
Copilot readiness recommendations to help organizations get ready for AI in Microsoft 365	✓	Not Available

A successful Copilot rollout relies on your tenant's readiness for AI.

To deploy Copilot, you need either SharePoint Premium licenses for all M365 users in your organization, or a third-party tool like Orchestra.

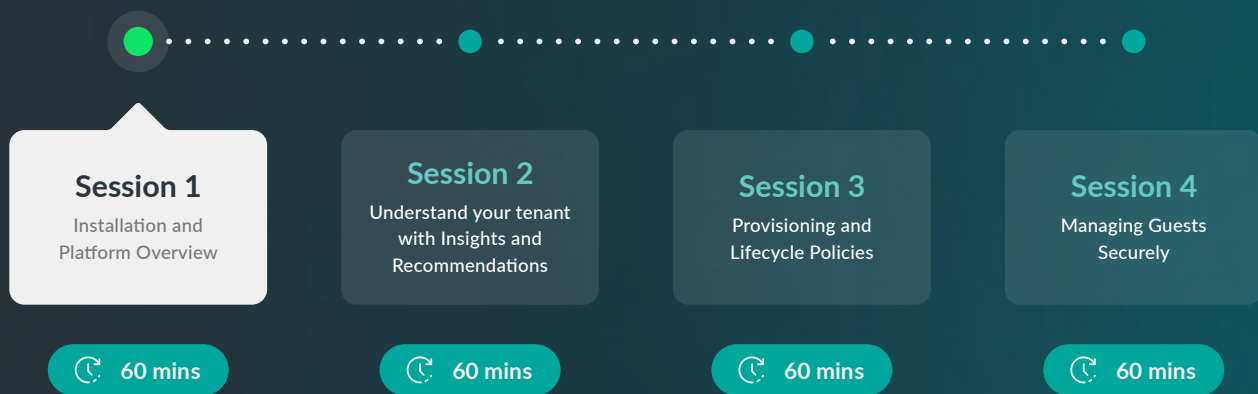

SharePoint Premium for 5000 users will cost USD\$180,000. Orchestra offers superior performance and functionality at a fraction of the cost, saving you over USD\$130,000 annually.

See Orchestra in action

Orchestra offers a 28-day managed evaluation. Our managed evaluation allows you to see the power of Orchestra in your environment. It's a risk-free yet real-world experience led by a member of our Success Team.

These sessions will provide insights, instructions, and guidance while allowing members of your team to be in the driver's seat throughout the sessions to explore the platform and gain firsthand experience.

Schedule a personalized live demo today!
