

Oriana Low-Code Platform

How can you leverage our platform?

ORIANA STUDIO

- Oriana Studio is an integrated development environment that empowers process owners to build applications and workflows easily.

ORIANA ENGINE

- It is the engine of customized business applications. It provides the basis for combining application blocks and running them as full-fledged solutions.

ORIANA BLOCKS

- You can select from a rich library of ready-to-use application blocks and functionality templates to create applications that suit your individual process needs.

Why Oriana

Powerful WF engine to support large-scale and complex requests and collaborative cases

Unified platform to digitalize and automate your company's core processes

Back-office administration, customer service and case management domain knowledge embedded in reusable elements

Scalable, flexible & enterprise grade solution

Easy integration: The Oriana low-code platform relies on open standards to ensure easy integration with ERP, access management, and other third-party systems.

No vendor lock-in

WHAT KIND OF SOLUTIONS CAN YOU CREATE WITH ORIANA?

Applications based on the Oriana Low-Code Platform

Oriana's applications offer the ideal compromise between buy vs build. With the extendibility and ease of low-code, new features and functions can be added as your business grows.

PROCUREMENT MANAGEMENT

Oriana's Procurement Management you can automate and integrate all your indirect procurement activities end-to-end.

RECORDS MANAGEMENT

Oriana's Record Management system can help you streamline records management processes from creating and storing records to access management.

CONTRACT MANAGEMENT

Streamline your contract lifecycle with a scalable and flexible contract management solution from creation through renewal and expiry.

Use cases for many business needs

There is a huge variety of business use cases that Oriana's low-code platform can support. Here is a selection of them grouped by departments and industries. Didn't find what you were looking for? Get in touch with us.
