

AI Design Workshop

Set the stage for executing on a comprehensive Data + AI strategy.

Objective The AI Design Workshop focuses on aligning AI capabilities with your business goals by mapping out key success metrics, data and tooling readiness, and the technical architecture required to operationalize the use case using the Microsoft AI ecosystem—including Azure OpenAI Service, Azure Machine Learning, and Microsoft Fabric.

Approach	Business Alignment	Use Case Definition	Readiness & Architecture
	<ul style="list-style-type: none">• Strategic Priorities• Identify AI opportunities based on priorities• Share relevant use case examples	<ul style="list-style-type: none">• Prioritize & define high-impact use case• Clarify business goals, stakeholders, KPI's	<ul style="list-style-type: none">• Assess Data & Tech environment• Map solution to Azure AI Services• Discuss Architecture, Governance, Scalability
