Cloud Transformation
Migration Services

Optimize, Reinvent & Modernize

Are you overwhelmed by Cloud Migration? Modernization to the cloud can be challenging. Let's make your enterprise cloud journey more sustainable.

Transformation Strategy

Complexities in program execution, aligning digital transformation goals, integrating cloud and legacy platforms, ensuring operational readiness, and organization changes can slow down cloud migration.

Governance Target Operating Model

There could be misalignments in the target operating model, a lack of cloud governance and productivity KPIs, and inefficient service management and operation.

Cloud Sustainability & Innovation

Organizations commonly face challenges in defining robust architecture and design principles that drive innovation, as well as defining clear use cases for sustainability and innovation.

Cloud Security

Challenges may stem from missing security policy and standards, missing data policy and standards, and gaps in security strategy and implementation.

Migration Roadmap

Businesses may have difficulties creating a cloud adoption & migration roadmap, overcoming roadblocks in migration acceleration, and managing expectations and trade-offs around TCO & ROI.

Cloud Financial Operation

A lack of cloud financial accountability, communication, cloud economics mapping, tagging for cost tracking, and policy enforcement can impact the migration process.

Orion's Cloud Migration Process

Cloud Foundation

- Setup Cloud Center of Excellence (CCOE)
- Deploy Orion Cloud Transformation Hub and migration tools
- Setup cloud migration foundations
- Prerequisite setup for migration templates and landing zones
- Establish the foundation for cloud adoption

Cloud Transformation

- Automated discovery
- Assessment & Rationalization
- Build migration plan and migration move groups
- Create migration business case
- TCO and ROI creation
- Execute cloud fitment and migration strategies.
- Design target architecture and estimate cloud costs
- Execute the migration process and decommission assets

Cloud Maturity

- Seamless integration into existing operation processes
- Identify collaboration and application improvement opportunities
- Continuous modernization
- Cost optimization & operational efficiencies

Cloud Operations

- Establish operation center post-migration
- Day 2 services of cloud change management
- SLA management and AIOps
- Cloud operation center to proactively monitor cloud alerts
- Cloud security operation
- Cloud finOps
- Monitoring architecture to meet well-architected frameworks

What's in it for you?

Key Benefits

- Establish cloud strategy and business case development effectively.

- Implement the cloud Well-Architected Framework.

- Enhance cloud security and compliance setups to drive increased cloud adoption, leveraging the migration factory.

- Accelerate speed to market with DevOps and cloud automation.

- Plan migration waves and sequencing for seamless migration to the cloud.

- Establish foundational standards for Day 0 and Day 1 activities, ensuring smooth enterprise-wide cloud adoption.

An Effective Cloud Operating Model:

- Cloud operation model customized to enterprise need

- Cloud competency enhancement to support diverse cloud migration strategies: cloud migration accelerators, automated discovery, and application rationalization

- End-to-end cloud automation for migration

- Sustained time and money savings with automation

- Preventive and retrospective policy enforcement

- Automated tagging by combining cloud data and other data sources available

Why Work with Orion?

What we offer:

Simple, easy & efficient process to:

- Educate enterprise on cloud migration benefits

- Assist in the business case to ROI realization

~30-35%

potential savings and perpetual ROI

Extensive experience of migration products and applications

Orion has been helping enterprises across different industries execute successful cloud migration initiatives. Our Cloud team is excited to empower even more businesses to realize their cloud and digital transformation goals. Let's work together.
