

Tactical Planner

Smarter Planning. Better Decisions. Stronger Results.

ORTEC Tactical Planner is the next-generation for tactical planning/static routes planning, delivering advanced tactical planning and optimization to help logistics organizations plan smarter, faster, and more sustainably. Designed to bridge strategic intent and daily execution, Tactical Planner enables planners to create realistic, feasible, and cost-efficient schedules while responding confidently to changing demand, capacity constraints, and service requirements.

**Plan Ahead.
Perform Better.**

ORTEC delivers next-generation tactical planning that helps logistics teams build realistic, cost-efficient, and sustainable plans with confidence before execution begins.

Intelligent Planning Capabilities Designed to Balance Cost, Service, and Sustainability

ORTEC Tactical Planner enables teams to build realistic, constraint-aware plans that hold up under daily operational pressure. The result is fewer manual adjustments and more consistent performance in execution.

Advanced Route and Schedule Optimization

Generate optimal, constraint-aware schedules that balance cost, service, and resource utilization.

Quick Scenario Analysis and Comparison

Quickly model and compare multiple planning scenarios to support faster, more confident decision-making.

Realistic and Feasible Planning

Ensure drivers, vehicles, and routes are scheduled based on real operational constraints and compliance rules.

Flexible Planning for Peaks and Variability

Adapt plans easily to fluctuations in volume, changing service requirements, and capacity constraints.

Sustainability-Focused Optimization

Reduce mileage and emissions that support sustainability goals without sacrificing service performance.

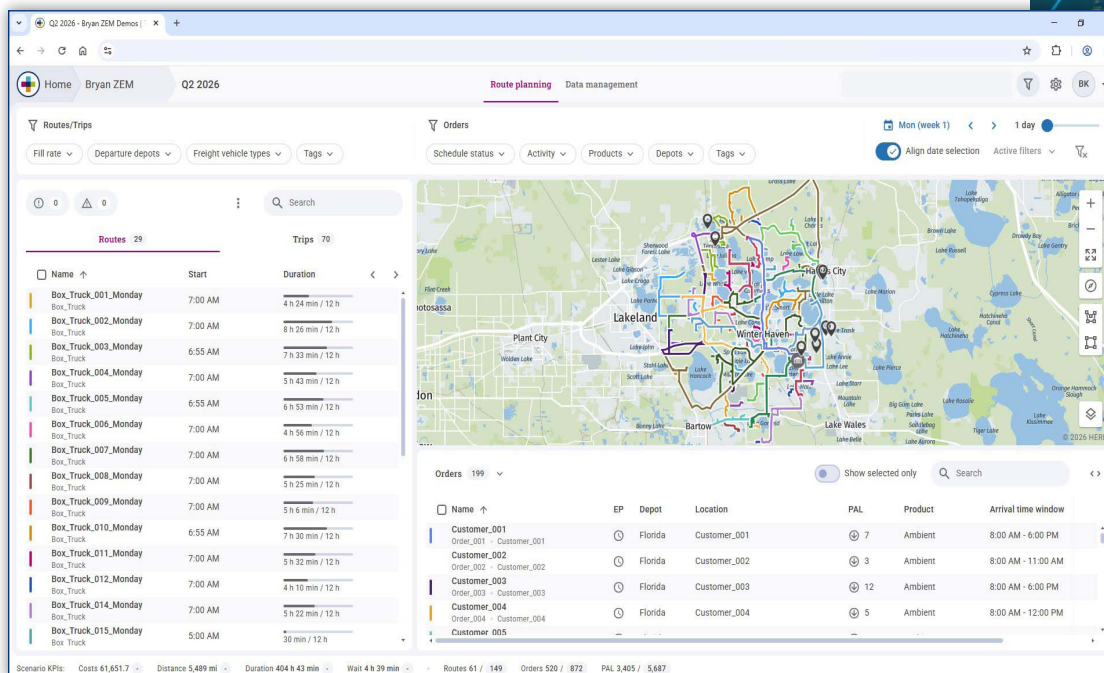

Turn Planning Complexity into Measurable Business Gains

ORTEC Tactical Planner helps planning teams manage daily complexity without adding manual effort or planning overhead. By turning tactical decisions into executable plans, it delivers measurable gains across cost, productivity, service, and resource utilization.

- ★ More cost-efficient routes that reduce total mileage and working hours
- ★ Longer-range views with a tactical schedule showing several weeks, for use in your operational planning and execution.
- ★ Lower CO₂ emissions, contributing to a cleaner environment through reduced overall mileage
- ★ Higher productivity, enabling more work to be completed with the same resources
- ★ Optimized fleet composition, ensuring the right vehicles are used for the right jobs
- ★ Improved customer service through accurate, reliable delivery appointments
- ★ Faster problem-solving by easily comparing alternative scenarios and outcomes
- ★ Reduced planning time, significantly shortening the schedule creation process
- ★ Realistic driver deployment based on feasible, compliant schedules
- ★ Greater flexibility to meet stringent and changing service-level requirements
- ★ Less reliance on subcontractors during peak periods through better fleet utilization
- ★ Lower overtime costs thanks to a more balanced distribution of workload

Beyond Routing: The Power of Tactical Planning

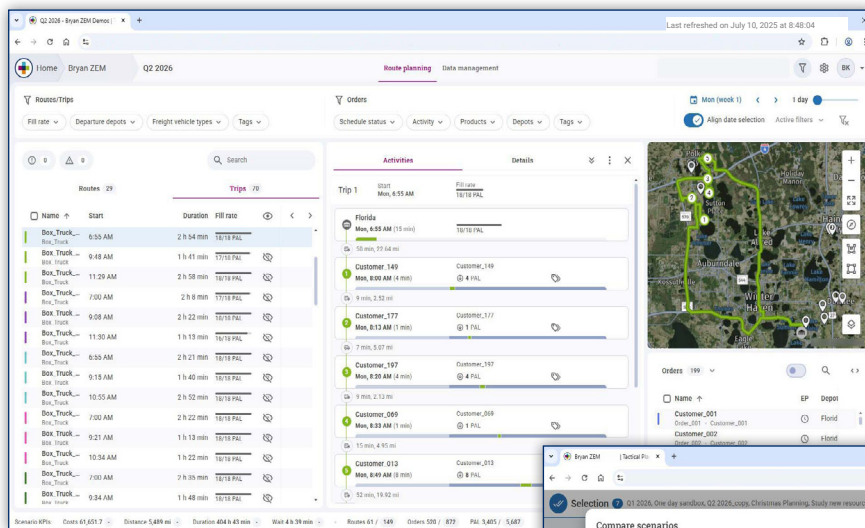

ORTEC Tactical Planner goes beyond routing. It transforms tactical logistics planning into a data-driven, forward-looking process, helping organizations reduce risk, control costs, improve sustainability, and consistently deliver high service levels. By moving from reactive routing to proactive tactical planning, organizations gain a lasting competitive advantage.

View and analyze master routes for a specific weekday to quickly understand planned coverage, workload distribution, and overall route efficiency.

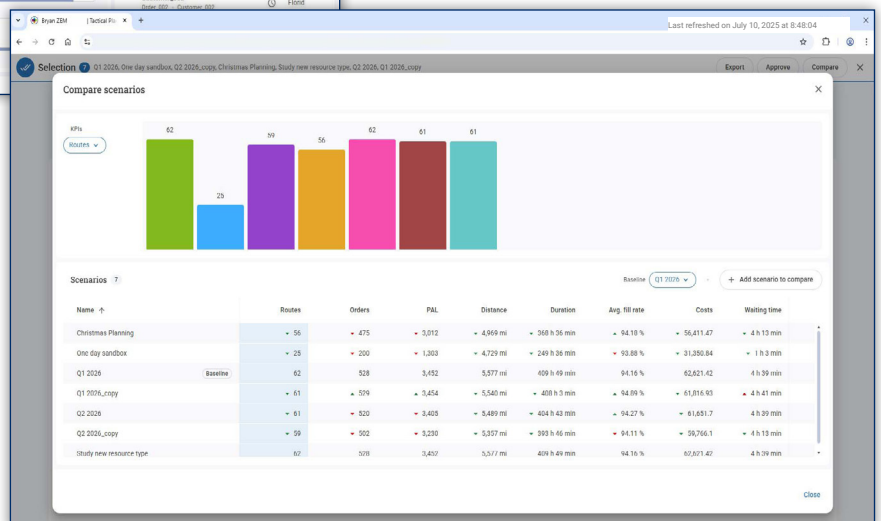

Optimize Every Mile. Plan with Confidence.

Logistics complexity continues to increase, with more orders, tighter delivery windows, higher sustainability expectations, and ongoing pressure to reduce costs. Traditional routing tools are no longer enough. ORTEC Tactical Planner replaces basic routing with a scenario-driven, optimization-based planning solution that empowers teams to evaluate options, anticipate outcomes, and choose the best plan before the daily plan begins. The result is faster planning, better decisions, and stronger operational performance.

Compare multiple planning scenarios in a single dashboard to easily evaluate trade offs and select the option that delivers the best performance. ↓

↑ Explore detailed route information with satellite imagery to validate feasibility, improve accuracy, and ensure routes align with real world conditions.

Plan with confidence. Optimize with insight. Deliver with ORTEC Tactical Planner.
