**IT**

**LIKE EVERYONE ELSE**

# Where IT Just Works

Choosing the right Managed Service Provider is fundamental to the success of your business. Unless your IT is being managed effectively, the problems can soon mount up. Outdated infrastructure, inefficient IT processes and a lack of IT leadership can leave your business trailing behind and vulnerable to attack.

At Ortus, we offer a wide range of managed IT services and solutions that can help streamline, transform, and modernise your business operations. Whether it's migrating services to the cloud, designing a new infrastructure, or providing exceptional customer support, we take the stress out of managing IT, letting you focus on what your business does best.

**We're the only ISO certified company in Ireland that consultants consistently recommend.**

## Why Ortus?

- ISO 27001 certified.
- No geek speak! Just easy to understand explanations.
- Certified, experienced, and dedicated account team.
- We have more servers in Azure than any other IT company in Ireland.
- Fourth generation of cloud products.
- Risk and compliance by design.
- Proactive security to keep your business safe from evolving cyber threats.
- IT services that align with your business strategy.
- We remove reactive processes and replace them with proactive solutions.

## Tailored IT Solutions

### Managed Cloud

From email and file access to all applications and security, your entire IT infrastructure, or part of it, can be hosted in the cloud.

### Managed Security

With our industry leading systems and solutions, we'll keep your business safe from unwanted threats and attacks.

### Managed Infrastructure

We design, project manage, install, and support your network infrastructure across all locations.

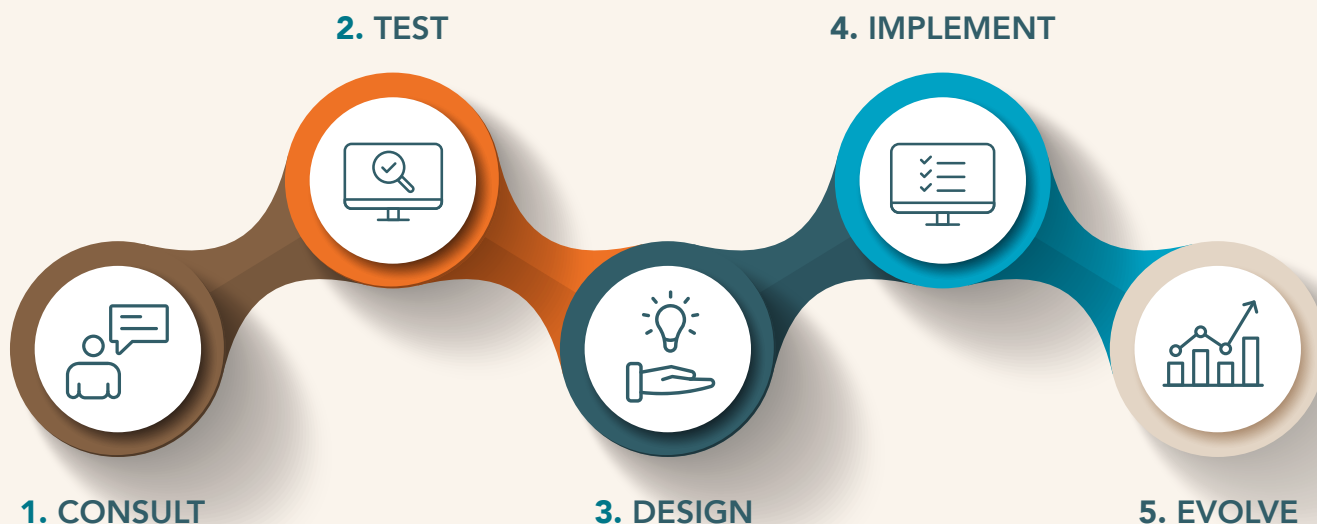

### Managed Recovery

Iron-clad IT infrastructure so that in the event of an incident, you can quickly retrieve your systems and data with minimal disruption.

# We've got you covered

---

From the initial consultation through to design, implementation, and ongoing support, Ortus will work closely with you to ensure that you get the most out of your technology.

## Say hello to proactive IT

We want our clients to benefit from the best possible service which is why we provide you with your very own dedicated support team and 'Virtual Chief Information Officer'. Your VCIO will provide a fresh and strategic approach to IT, identify gaps in your IT processes, advise on industry trends, and ensure that the right technologies are in place to take your business to the next level.

# Alignment

Our alignment process, coupled with our ISO 27001 certification and auditing to over 400 Ortus standards, ensures that your IT infrastructure is in safe hands and proactively being monitored and secured 24/7. Effectively, we stop any problems before they even begin.

## Numbers never lie...

**99.99%**  
GUARANTEED  
UP TIME

**98.07%**  
CUSTOMER  
SATISFACTION

**99.14%**  
OF CONTRACTS  
RETAINED

## Don't just take our word for it....

*We've been working with Ortus for over 6 years. The service has always been top class and their staff are a joy to deal with. They've literally never let us down and how many providers can you say that of? As a business owner there are a myriad of things that I need to worry about, but thankfully IT and Data Security are not among them. For that I can thank Ortus.*

Robert Whelan,  
Managing Director, Rockwell.
