# BasiCare

"Designed for patient care, not paperwork"

What is BasiCare?

BasiCare is an **Electronic Medical Record (EMR)** system designed for **primary healthcare organizations** and **private clinics**. It offers a wide range of functionalities to efficiently manage **patient health records** and **streamline clinic operations.** Additionally, BasiCare serves as a **basic EMR system**, making it an ideal solution for **small-scale hospitals** as well.
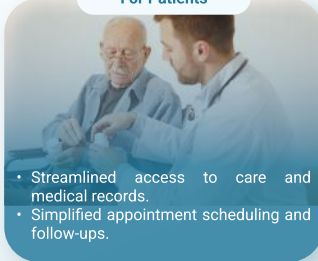

Who benefits from BasiCare?
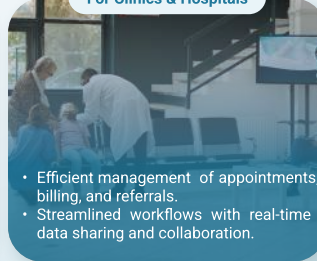

For Family Doctors & Clinicians
- Centralized patient records for informed decision-making.
- Easy access to patient history, test results, and prescriptions.

For Patients
- Streamlined access to care and medical records.
- Simplified appointment scheduling and follow-ups.

For Clinics & Hospitals
- Efficient management of appointments, billing, and referrals.
- Streamlined workflows with real-time data sharing and collaboration.

Key Features of BasiCare

Clinical Documentation
Record and review medical encounters with ease through customizable templates.

Seamless Integration
Integrates with Hospital, Laboratory, and EHR systems to streamline data flow, reduce errors, and enhance coordination.

Cross-Platform Access
Access medical data anytime, from any device or location.

Secure&Compliant
Robust data protection with global compliance (GDPR, HIPAA).

Billing & Insurance Integration
Process claims, generate invoices, and track reimbursements effortlessly.

Standard Support
HL7 FHIR, SNOMED, ICD10, and LOINC terminology standards
