

VacTrack - Vaccination Tracking & Management

“Lifelong Immunization, Smartly Managed”

What is VacTrack?

VacTrack is a **next-generation solution** for managing and tracking vaccinations, ensuring a **seamless and efficient immunization process**. It facilitates **scheduling, administration, and monitoring** of vaccinations. VacTrack operates on **public or private cloud infrastructure**. It **integrates** with **health records** and vaccination programs to enhance **efficiency and compliance**.

Who benefits from VacTrack?

Hospitals & Health Groups

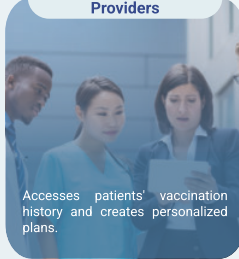

Optimizes vaccination processes and facilitates patient access.

Municipalities & Public Health Institutions

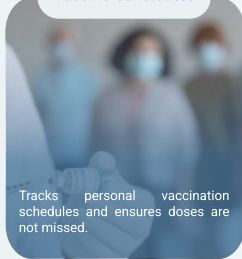

Coordinates large-scale vaccination programs.

Doctors & Vaccination Providers

Accesses patients' vaccination history and creates personalized plans.

Vaccine Candidates

Tracks personal vaccination schedules and ensures doses are not missed.

Key Features of VacTrack

Automated Scheduling

Automates vaccine timelines based on national policies.

Seamless Integration

Supports HL7, FHIR, SNOMED, ICD10, and LOINC standards.

Cross-Platform Access

Manage vaccinations from any device, anywhere.

Secure&Compliant

Ensures data security with GDPR and HIPAA compliance.

Billing & Insurance Integration

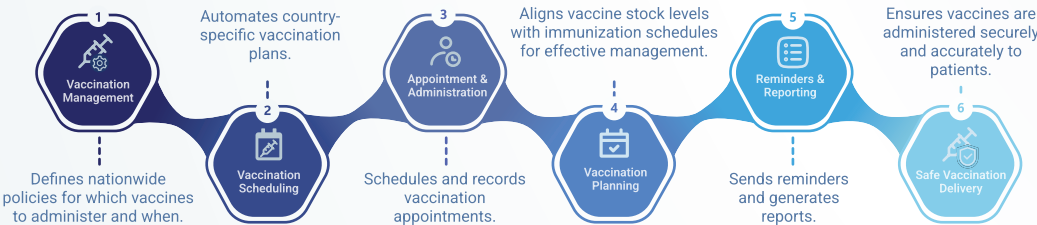

Connects with financial systems for claim processing.

Smart Notifications

Sends reminders and integrates billing and insurance claims.

How Does VacTrack Work?

References

1.500.000+
vaccination per year for children

85.000.000+
patient

200.000.000+
vaccination record

60+
