

Protect, Optimize, Thrive

Unlock the Power of Secure
Directory Services

Our Directory Services Healthcheck is designed to optimize and secure your Active Directory (AD), ADFS, and Microsoft Entra ID environments, ensuring your workforce can operate efficiently and securely.

In just 3-4 weeks, we provide a detailed assessment with actionable recommendations tailored to your organization.

What we offer

1. AD, ADFS, and Microsoft Entra ID Assessment

We perform a comprehensive analysis of your on-premises and Microsoft Entra ID environments, focusing on performance optimization, security enhancements (such as Privileged Admin Workstations and Privileged Access Management), and Pass-the-Hash mitigations.

2. Stakeholder Workshops

Our team conducts interviews and workshops with key personnel to understand your current environment, operational challenges, and workforce identity needs.

3. Detailed Findings & Recommendations

You'll receive a full report with prioritized recommendations focused on Zero Trust concepts, including security improvements and an action plan to address potential vulnerabilities.

4. Roadmap & Budget Estimates

A high-level roadmap for implementing the recommendations is provided, complete with budgetary estimates to support planning.

5. Final Readout

We wrap up with a final presentation of findings and the roadmap, ensuring you have everything needed to move forward with a Modern Identity Solution.

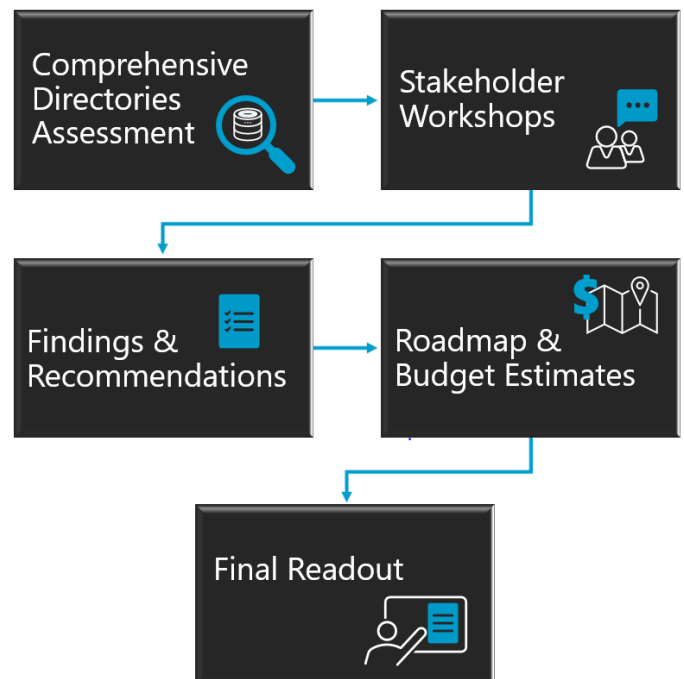

Optional Add-ons: Microsoft Identity Manager, B2B, and B2C services can be included as additional assessments.

Get started today!

Why choose OCG?

- **Security-Centric:** We prioritize security, addressing key risks like Pass-the-Hash attacks and enhancing privileged access management.
- **Fast & Actionable:** Results are delivered in 2-3 weeks, with a clear prioritized path forward for immediate improvements.
- **Workforce Focus:** The health check is designed specifically for workforce identity services, ensuring alignment with your organizational needs.

Who we are

Oxford Computer Group (OCG) has been at the forefront of identity and access management solutions for over two decades.
