

## OFFERING PRESENTATION P3.

Assessment of an existing or potential MS Power App (3 hours).

# OUR DELIVERABLES FOR THIS CONSULTING SERVICE

Together with you, we assess the functionalities and possibilities of one or more existing and/or potential Microsoft Power App(s) for your business case(s).

## Assessment of an existing or potential MS Power App

At the end of the **3-hour-assessment** and analysis we will have worked through the following topics with you:

- + Examination of your today's processes
- + Identification of the most valuable process(es) which can be optimized and automatized with the **MS Power Apps**
- + Evaluation of other **MS Power Platform** products that could be useful for your business case(s)
- + Estimation of price and duration for the next steps (e.g. realization of a 'proof of concept' and/or a 'complete implementation')

## Background for this Assessment

MS Power Apps enables businesses to tackle different problems with fast implemented Micro-Apps instead of developing resource intensive and complex macro solutions. Typical focus points are:

- (Part-)Automation of time-consuming and risk-prone manual and administrative processes
- Gathering new data which will directly be analyzed for business decisions
- Creation of a more connected and thought through environment within a business

## Target Group for this Assessment

- Executives
- Process Owners
- Product Owners
- Employees with administrative roles in a company

# THE PROCEDURE OF THIS CONSULTING SERVICE

One of our main goals is to transfer our MS Power Platform knowledge to our customers, so that they learn how to use these low code environments themselves. Thus, in the future, small adaptations of the digital solution(s) can be executed by our customers as well.

1

## 1st Contact

We want to fully understand your problem or where we can help you: Either we can assess your existing MS Power App or assess the opportunities of developing a new one.

2

## Create Workshop-Agenda

We design and create an individual agenda for the upcoming assessment-workshop.

3

## Workshop-Execution

Together with you, we carry out the workshop where you wish - either remotely, in one of our modern P3 offices in Europe or as well in your office.

4

## Defining Next Steps

We elaborate the results of the workshop and with the help of this we discuss further plans of action together with you.

# POSSIBLE AGENDA

## Assessment Workshop

- 01 Introduction – who is P3?
- 02 Possibilities of MS Power Apps (with examples)
- 03 Presentation of business problem(s) and/or existing MS Power Apps
- 04 Collaborative hands-on discussion: How can MS Power Apps help?
- 05 Develop a first action plan
- 06 Wrap-up of today's workshop

# WE BRING MICROSOFT POWER APPS TO YOU

Power Apps provides a fast and flexible low-code development environment for creating custom applications for business purposes.

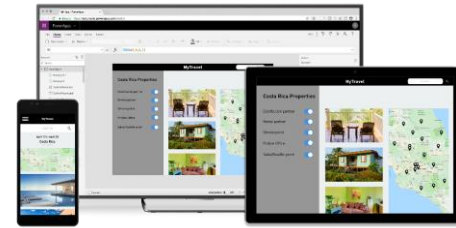

## Power Apps

Easy low-code app development

- ✓ Build highly customized task- and role-based canvas apps with just a few easy and intuitive clicks instead of expensive native code programming. For more complex apps with a lot of logic, model-driven apps can be created
- ✓ Use more than 275 data connectors and take advantage of a scalable data service (Common Data Service) to enable easy integration and interaction with existing or new data
- ✓ Integrate Power Apps in other Microsoft programs like MS Teams and achieve high user acceptance and a make use of a simple roll-out

Possibility to create **web and mobile applications** that run on all devices with responsive designs

```
ion(a){c.disconnectedMatch=s.call(a,"div"),s.call(a  
b&&b  
reDo mentPosition: return d7d/(id=(a.ownerDocument)/a  
b) 0 4  
n d ka  
Lower Case  
ling)  
1319 0 3
```

People can use apps for every aspect  
in their daily lives, it shouldn't be any  
different in a business!
