Seamlessly Synchronize
your **Corporate Directory** with
Smartphones, **Microsoft 365** or **Exchange**

Merge Data Sources	**Sync GAL to Smart Phones**	**Contact Groups, Distribution Lists**
iOS & Android Apps	**Mass SMS for Emergencies**	**Caller ID Provider**

Review details on the other side of the page.

Integration to Active Directory, CRM, HR, or any Database

Using connectors, different parts of the corporate directory can be gathered from different systems including Active Directory, CRM databases (e.g. Microsoft Dynamics, Salesforce), HR databases (e.g. Ultipro), or any other database; then the data is merged into one list forming the corporate directory on CorpSync database.

Integration to Microsoft 365 and Exchange

Connections to both Microsoft 365 and On-Premise Exchange 2010 and above are supported.

Contact Grouping & User Subscriptions

- CorpSync groups can be created for departments or teams, and subscription groups can be formed to receive those contact groups.

- Subscribed users never need to add, edit, or remove corporate contacts.

- When a user leaves the company, the contact details is automatically removed from user devices. and when a new person joins the company they are added to groups automatically based on setup rules and their contact will be pushed to all subscribers.

Mass SMS / Emergency Messages

Send/Receive critical information with other users at times of emergencies including network outages, closures, etc.

Caller ID and Mobile Voice Assistants

CorpSync can push contacts to smartphones native contact list which enables use of mobile voice assistants (**Google Assistant** and **Siri**) and caller id.

Boosting Your Success

With CorpSync users will no longer have to manually enter corporate contacts (e.g. phone number, email address, position, etc.) into the device or retrieve it from any other application or source; thereby saving time and increasing productivity for all users subscribed to this platform.

iOS and Android Apps

CorpSync mobile app provides an alternative option for users who do not want their business contacts in their native mobile address book.

Scalable Subscription Plans

Don't need it for the whole company? Just add subscribers to your plan as required.

No Training Required

No company-side training necessary. Low admin burden with Seamless implementation and no desktop or mobile installation required.

Azure Infrastructure

CorpSync is hosted on Microsoft Azure providing high availibility, daily backups, and state of the art security for access and data storage.
