

## Harness the Power of Your Microsoft 365 Investment

**PAIT Group's Assessment and Planning Services** can help you modernize your legacy intranet, improve your work from home experience, and integrate your frontline workers. Whether your organization is just getting started with Microsoft 365, struggling through a challenging implementation, or you find yourself overwhelmed with rapid adoption...

### PAIT Group is here to help!

PAIT Group builds strong, lasting relationships to fully understand the way organizations run their businesses. We work side-by-side with you to go beyond the standard technical implementations to provide real value for your unique needs, ensuring that you maximize your ROI in Microsoft 365.

### Our Process

1 Full day onsite or 4 to 6 virtual meetings with your business stakeholders to discuss how they work, where they keep their content, and what pain points they have.

Time spent with your technical team to perform an assessment of existing legacy intranet, content management system, or file shares.

Work side-by-side to develop a migration and deployment plan that will keep your intellectual property secure while providing the best experience for your employees.

### Optional Frontline Workshop Uniquely Crafted for the Healthcare Industry

- Need to make it all easier to access? Let's discuss how to ease data entry pain points, improve communications, and streamline cumbersome processes for doctors, nurses, and other desk-less staff workers
- Concerned about data privacy? Let's talk about Microsoft's layers of security to keep data protected.
- Questions about kiosks? Let's talk about the new licensing and policies to make managing shared kiosks easier than ever.
