- On-going Support Services
- Executive Advisory & Strategy

Our Team is ...

- Microsoft Regional Director & MVPs
- Modern Workplace Strategists
- Cloud Architects, Designers, Developers, IT Pros, Trainers, & Power Platform Specialists

Microsoft
Regional Director

Teamwork & Modernizing Your Workplace

- We plan with the business in mind - what are their pain points? Then we map solutions to their needs rather than deploying technology for the sake of technology.
- Migrate from legacy SharePoint, legacy Intranets, file shares or other third-party systems knowing your architecture will scale long-term.
- Our approach to Teams & SharePoint deployment will not only engage your workforce, but help them imagine the art of possible by working in a new way.

Intelligent Intranets

- Take your intranet to a new level with modern, mobile-friendly sites, targeted communications, and multilingual capabilities & integration with Microsoft Teams.
- Provide a central launch point to integrate with all of your line-of-business systems.

Remote Work & Safe Return

- Securely connect your workforce no matter where they are without the need for VPN and rogue third-party tools.
- Create processes and workflows to support a safe return to the office.

Business Process Automation

- Utilize the Power Platform to automate processes through mobile-friendly forms, workflows, and dashboards.

Transforming & Modernizing Your Firstline Workforce

- Embrace the unique needs of your firstline workers.
- Provide simple, modern solutions to increase engagement while transforming the desk-less worker experience.

Ongoing Support

- Go beyond traditional technical support to work with specialized resources based on your specific needs.

Executive Advisory & Strategy

- PAIT Group uses our close relationship with Microsoft, as well as other vendors, to help you understand where to take your organization next & avoid common pitfalls.

- Engage PAIT Group for our **Team Work Assessment and Planning Services**.
- Follow our proven methodology for creating a **Roadmap using Microsoft best practices**, while focusing on a **right-fit approach**, unique to your organization.
- Eliminate redundant software as well as Shadow IT.
- Secure & govern your scaling environment with **ongoing support**.
- Continue to look for **value-add opportunities**.
- Continue to look for value-add opportunities using the **Power Platform, Bots, Artificial Intelligence**, and **Custom Software Development**.

HOW IT WORKS
