

Transform your workplace for secure and effective collaborations in the digital age

Managers are looking for solutions to digitalize businesses to empower new initiatives and data-driven decisions with their enterprise intelligence to help them excel in the competitive marketplace.

With more businesses moving into virtual environments, data are always being shared without consent and notice. Managers cannot simply rely on security and data privacy models – they need to fundamentally change their way of protecting business data by securing the flow of information.

Based on proven, award-winning next-gen eDMS technologies, SmartShare Enterprise is a secure platform for sharing and collaboration designed for users in the digital age with numerous innovative functions that help develop digital culture in your environment to facilitate successful digital transformation.

Advanced data protection

- Provide advanced permission report that shows users access right of all files and folders help meeting compliance requirements (i.e. GDPR)
- Full admin and user activity logs are available for audit trail
- Face ID and fingerprint authentication for mobile device login
- Support two-factor authentication (2FA) as an additional security layer to protect user account
- Granular permission settings provide complete access control
- 256-bit encryption of all data, both in transit and at rest

Seamless integration with Exchange, Outlook and O365

- Documents dragged onto Outlook / O365 email window will be converted into URL links for convenient and secure sharing of large files; users can undo sent document and turn off access to shared documents anytime
- Enable fast and secure file request by sending out file upload URL links
- MailCatch function that automates email archiving with rule-based filing
- Support filing emails directly into document folders to automate work process
- Allow document direct editing by check-in / check-out with version control

Key benefits

- Centralize documents into one repository for systematic archival and easy retrieval for business continuity
- Secure document sharing functions enhance data security, foster engagement and collaboration between teams inside and outside your organizations
- Intuitive user interface and seamless integration with popular apps encourage user adoption in workplace
- Not cloud only, but a new design with cloud-native application architecture – scalable, highly available and easy to expand and functions, ready to integrate with APIs, etc.

SmartShare Wolf Actionable Dashboard for data-driven decision making

- Help users find the right time to engage team members with real-time visitor notifications when your documents are opened
- Include Wolf tracking dashboard that shows data such as who in the organization looked at the shared documents, numbers of views, clicks and downloads after sending out email with links
- SmartShare Wolf automatically sends out event reminders until completed
- Create a document upload list to collect and receive files from anyone in a project or recurrent bases

Smart administration for digital-first users

- Integration with popular social media and instant messengers for convenient file sharing (i.e. WhatsApp, WeChat, Line and AirDrop etc.) with SmartShare app available for both iOS and Android
- Dark theme UI option to reduce flicker, eye fatigue and battery consumption
- Superior document viewing experience (no installation required) for instant preview – supports most document types with download / print control and annotations functions
- Easy user account setup, management and transfer for business continuity
- Auto-generated QR code marked on printed documents enables fast softcopy lookup

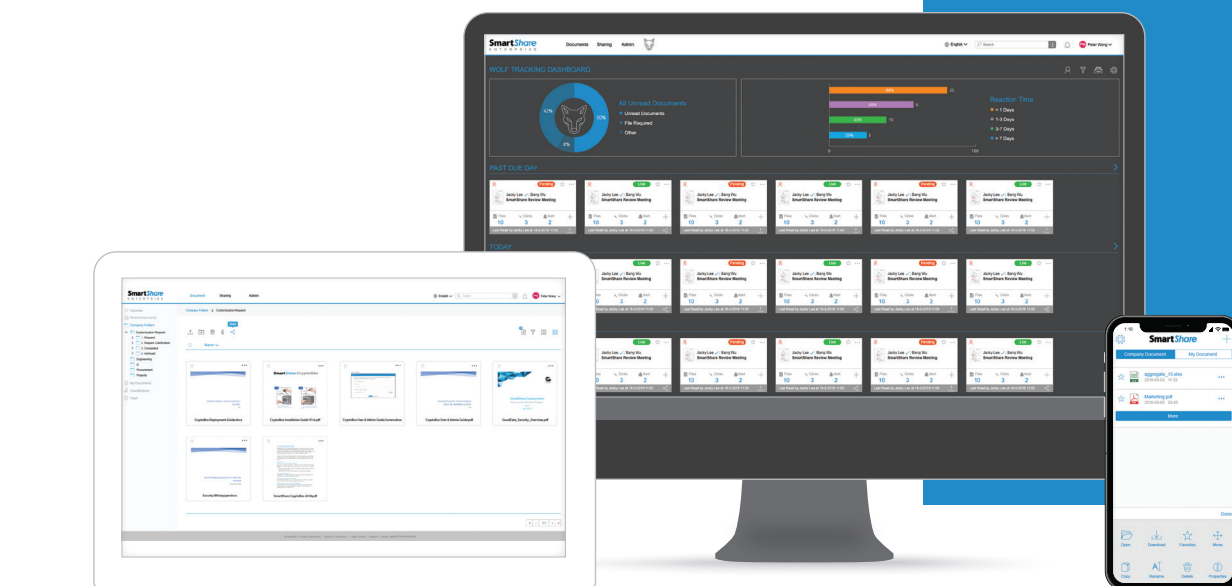

SmartShare Connector for Fuji Xerox multifunction devices (MFD)

- Support secure pull printing
