ThinkAutomation

Your digital automation studio

Limitless processing, limitless automations

PARKERSoftware

Engaging Applications · Engaging Results
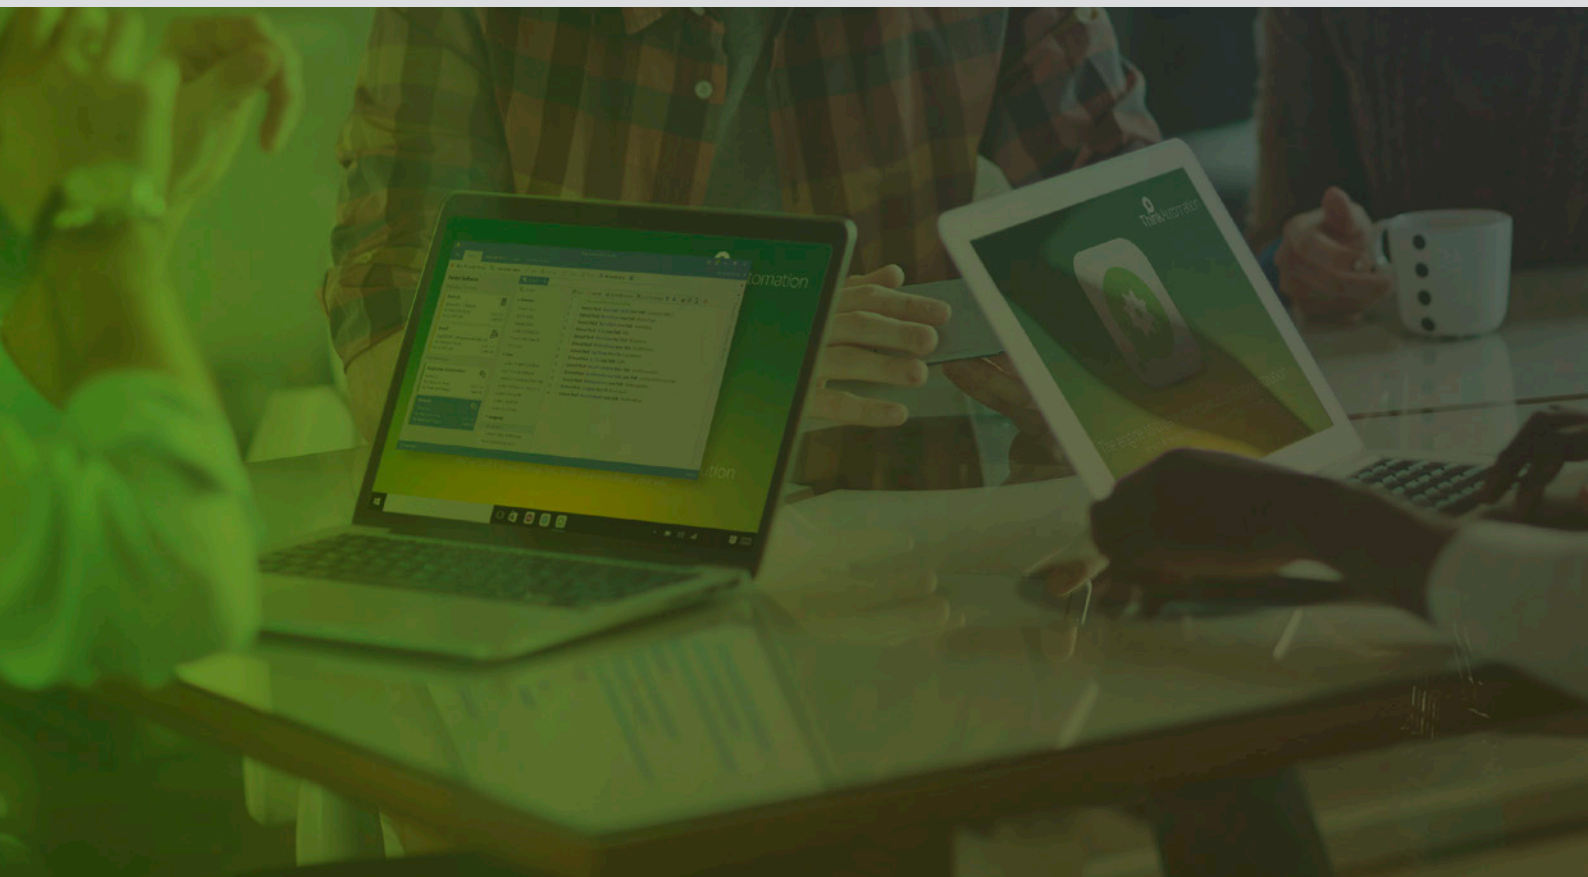

ThinkAutomation

Develop the automations that work for you. With ThinkAutomation, you get an open-ended studio to build any and every automated workflow you could ever need. All without volume limitations, and all without paying per process, licence, or 'robot'.

Design simple or complex workflows

Parse any volume of data from any source

Run any number of conditional automations

Integrate into any API with seamless data flows

Extend and customise via a fully featured code editor

Limitless processing, limitless automations

ThinkAutomation

Automate any process, in any application

- iPaaS / data integration
- Auto-responses
- Form / survey building
- Email parsing
- Threat monitoring
- Web scraping
- API gateway management
- Data cataloguing
- Document processing
- Database pulls
- Big data analytics
- Telephony automation
- Sentiment analysis
- IoT monitoring
- Extract, transform, load
- Translation

> "The time savings so far in using ThinkAutomation have been considerable. We're probably just scratching the surface of the potential efficiencies the product can provide an enterprise of our size."

xerox

Limitless processing, limitless automations

ThinkAutomation

Fast, endless data flows

Monitor

Every system in
your stack
monitored 24/7

Automate

Actions conditionally
executed in split
seconds

Parse

New data pulled and
processed every
minute

Repeat

Continuous automation
that scales as
you do

> "The product is nothing short of a masterpiece."
