AI Readiness Use Case Assessment

Our single report will contain the following components:

1. Use Case Suitability Assessment

Our team analyse the suitability of AI for a primary and alternate use case, evaluate solution challenges and present alternatives. Specific AI models applicable to each use case will be identified, as well as consideration of return on investment, customer perspectives, and board risk appetite.

▶ Use case suitability assessment with recommended solutions and AI model suggestions.

2. High Level Data Suitability Evaluation

An examination focused on determining data suitability for different AI models. The evaluation of data readiness including: labelling, timeliness, accuracy, availability, and completeness, with consideration to fair and ethical use.

▶ Data suitability assessment with recommendations for data preparation.

3. Risk Management Considerations

A high level assessment of the risks and impacts of the intended use case. This includes external factors like regulatory compliance and customer sensitivities and internal factors including required system and data changes

▶ An assessment of risk and impact with high level risk management strategies.

4. Technology Readiness

A review of existing data stores and sources, providing actionable recommendations on how your Azure environment can ingest, store and structure data to support your AI use case.

▶ Technology compatibility assessment with implementation recommendations.

5. AI Adoption Roadmap

A high level assessment of People, Process and Technology requirements to support the targeted and considered AI use cases with a focus on prioritisation for highest potential positive impact to the business

▶ AI Adoption roadmap with prioritised use cases and resource allocation plan.

Benefits

1. A reduced risk of failure or improved ability to pivot to a more suitable solution earlier.
2. Lowered cost associated with model build.
3. Improved speed to market.
4. Proactive management of common AI/ML issues, including over fitting, bias, ethical missteps and model float.

Investment

Our comprehensive 4-5 day engagement is priced at $8,800 + GST. This provides your business with a targeted assessment and strategy framework, equipping you with the clarity and direction needed to successfully implement AI solutions.

Result

Through AI Fit, you'll gain clarity on the optimal solution for your unique challenge. Whether it's an AI model or one of the myriad of other data solutions, we ensure it's efficient, effective, and manageable. This results in tangible benefits for your organisation: greater ROI, reduced risks (repetitional, cost blowout, failure), and increased adoption. With our partnership, you'll make informed decisions early, confidently leveraging AI's transformative potential to stay ahead in your market.
