

PBI Analytics - Dynamics 365 + Power Platform Real-Time Insights Accelerator

Powered by Microsoft Fabric Link, this accelerator enables real-time, no-ETL, no-copy data replication from Microsoft Dataverse (Dynamics 365 & Power Platform) into Microsoft Fabric. It provides instant access to live business data for analytics, AI, and Power BI reporting.

Key Benefits:

- Real-Time Replication: Continuous synchronization from Dataverse to Fabric OneLake.
- Zero ETL Maintenance: Fully managed SaaS-to-SaaS connection.
- Unified Analytics: Integrate Power Apps, Dynamics 365, and Power BI in one platform.
- AI & Copilot Ready: Train ML models and enable Copilot insights on live data.
- Cost Savings: Reduce storage, maintenance, and pipeline complexity.

Architecture Overview:

1. Dynamics 365 / Power Platform data in Dataverse.
2. Fabric Link syncs data in real time to Microsoft Fabric OneLake (Delta Parquet format).
3. Access data via Fabric Lakehouse, Warehouse, SQL Endpoint, or Power BI Direct Lake.
4. Enable analytics, AI, and Data Activator workflows - all in one SaaS environment.

Target Customers:

- Enterprises using Dynamics 365 Finance, Operations, or Customer Engagement.
- Organizations leveraging Power Platform seeking real-time analytics.
- Partners building AI-enabled reporting solutions on Microsoft Fabric.

Outcomes:

- Real-time dashboards on Dynamics 365 data.
- Simplified architecture with no ETL pipelines.
- 6-8x storage efficiency via Delta Parquet compression.
- Seamless Copilot and Power BI integration.
