

Azure Business Continuity and Disaster Recovery (BC/DR) Assessment Service

All organizations want to have the right Business Continuity and Disaster Recovery (BC/DR) solution aligned to their business needs. To minimize downtime and data loss, the proper BC/DR Solution considers the complexity of your organization, as well as the services and processes that make up your technology usage. Through the Connection Azure BC/DR Assessment Service, our experts will help your organization evaluate the best possible path to adopt a Microsoft Azure BC/DR solution.

www.connection.com

Azure BC/DR Assessment Services

Connection will review the following areas within your existing environment:

 Virtual Machine Compatibility	 Bandwidth
 On-premises Infrastructure Requirements	 Business Requirement Alignment

Business Solutions
1.800.800.0014

Enterprise Solutions
1.800.369.1047

Public Sector Solutions
1.800.800.0019

Connection's Azure BC/DR Assessment will provide your organization with documentation containing information, such as:

BC/DR Design

Connection's Microsoft Services team will design a BC/DR solution within Azure for existing cloud or on premises-based workloads, in the case of a catastrophic outage, data corruption, deletion, or loss

Cost Analysis

An estimate of your Azure costs for the recommended solution

Custom Statement of Work

To aid you in your efforts to implement your Azure BC/DR solution

**Plan and prepare for business Interruptions to reduce the impact and shorten recovery times.
