

# MANAGED SERVICES FOR CLOUD COST OPTIMIZATION

Microsoft Partner | Azure Expert MSP

Our Managed Services for Cloud Cost Optimization offering helps you identify and eliminate wasteful spending on cloud resources.

We provide the necessary scalability and flexibility to manage your changing cloud infrastructure needs and optimize costs accordingly.

As your trusted, expert cloud advisor, Connection offers multi-cloud cost optimization managed services. By identifying and implementing cost-saving measures across multiple cloud platforms, Connection will maximize the value of your cloud investments without impacting performance and reliability—all proactively monitored with 24x7x365 support from our expert team of engineers.

## Key Motivators

**Cost Reduction:** Organizations need to identify and eliminate wasteful spending on cloud resources, optimize their usage patterns, and leverage cost-saving measures offered by cloud providers.

**Complexity of Multi-cloud Environments:** Many companies use multiple cloud platforms to support their business operations, which can create complexity in optimizing their cloud costs.

**Lack of In-house Expertise:** Many organizations lack the in-house expertise to manage their cloud infrastructure and optimize their cloud costs. Connection can provide the necessary expertise and experience to manage your organization's cloud resources efficiently and effectively.

**Time Constraints:** Cloud cost optimization requires ongoing monitoring and analysis of cloud usage patterns and optimization opportunities, which can be time-consuming for organizations.

**Scalability and Flexibility:** As organizations grow and scale their operations, their cloud infrastructure requirements may change.

## Core Offering Components

- 1. Cloud Cost Assessment:** Analyze usage data, cost reports, and other relevant metrics of your existing cloud infrastructure to identify areas of potential cost savings.
- 2. Cost Optimization Plan:** Based on the assessment, our team will develop a cost optimization plan that outlines specific actions.
- 3. Cost Optimization Implementation:** We will collaborate with your team to implement the cost optimization plan, including making any necessary changes to your cloud infrastructure and applications.
- 4. Continuous Monitoring and Optimization:** We will ensure your cloud costs remain optimized over time by continuously analyzing usage patterns, cost reports, and other relevant metrics to identify new opportunities for cost savings and optimization.
- 5. Reporting and Analytics:** You will receive regular reports and analytics that show how your cloud costs are being optimized over time.
- 6. 24x7 Support:** We can address cloud cost optimization related concerns and resolve issues before they impact performance or incur additional costs.
