Employee Onboarding

The image displays three tablets showcasing the recruitment form interface. The background tablet shows the 'Recruitment Form' title and a 'CREATE NEW FORM' button. The middle tablet shows the 'Computer Skills' section with fields for MS OFFICE, SAP, GRAPHIC and DESIGN, DATABASE MANAGEMENT, and INTERNET AND NETWORK TECHNOLOGIES. The foreground tablet shows the 'Personal Information' section with fields for TC ID NUMBER, NAME SURNAME, PLACE OF BIRTH, DATE OF BIRTH, HOME ADDRESS, MARITAL STATUS, GENDER, PHONE NUMBER, OTHER PHONE NO., MAIL ADDRESS, SOLDIERING, EXEMPT DESCRIPTION, COMPLETED DATE, and POSTPONED DATE.

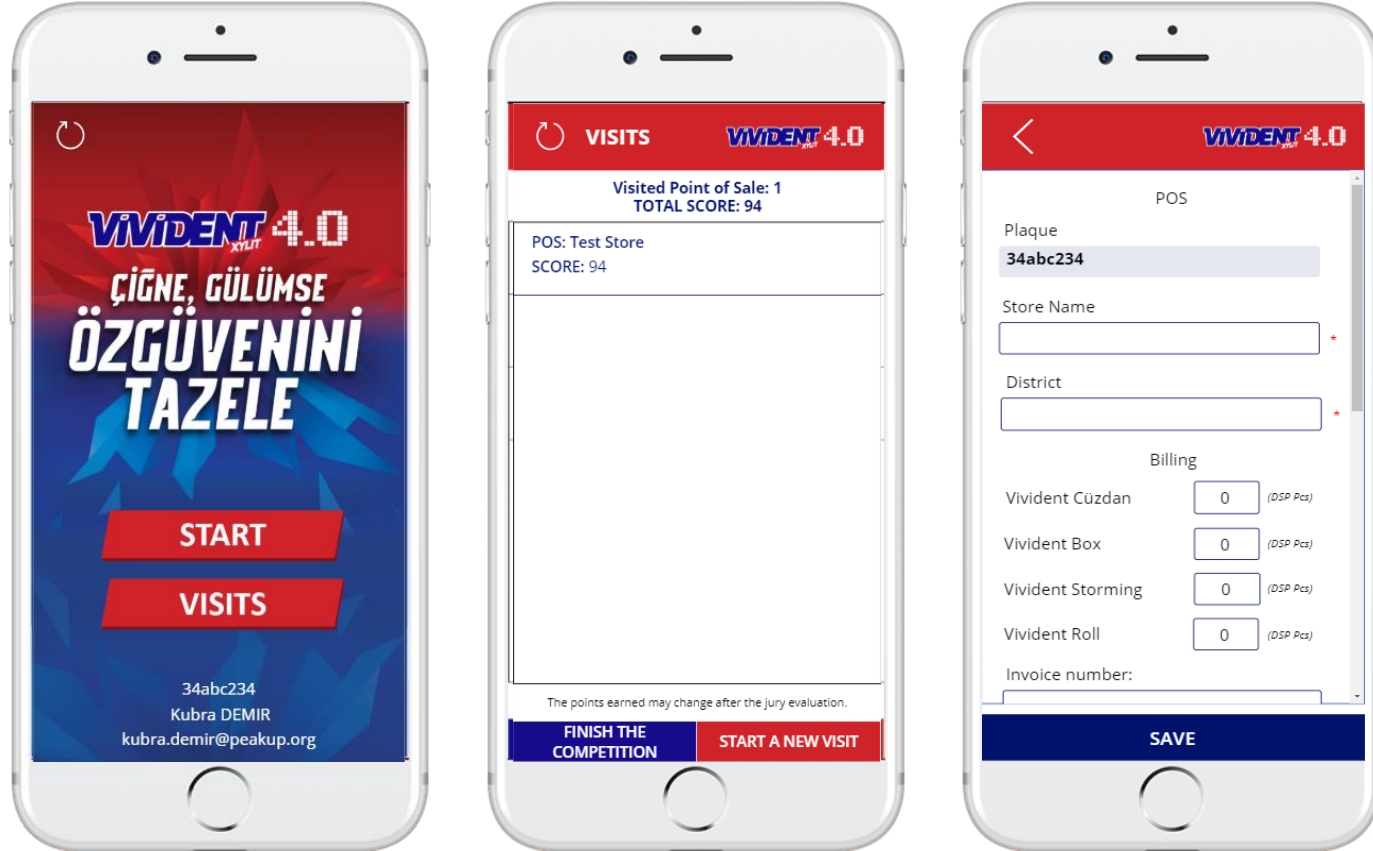

During the Covid-19 process, staff continued to work from home, but recruitments are also continuing. It is important that the CVs of the staff to be hired in this process are accessible from a common interface.

The Personal Information, Education Information, Business Experience, Certificate and Course Information, Skills, other additional information and KVKK texts contained in the staff Cv sicles contain the information the IK department needs most.

When collecting this information, kvkk collects lighting text and open consent forms with user approval, so that it can perform kvkk boards.

Personal data is stored securely and in one place because the data is kept in a central and secure area.

Sales Gamification

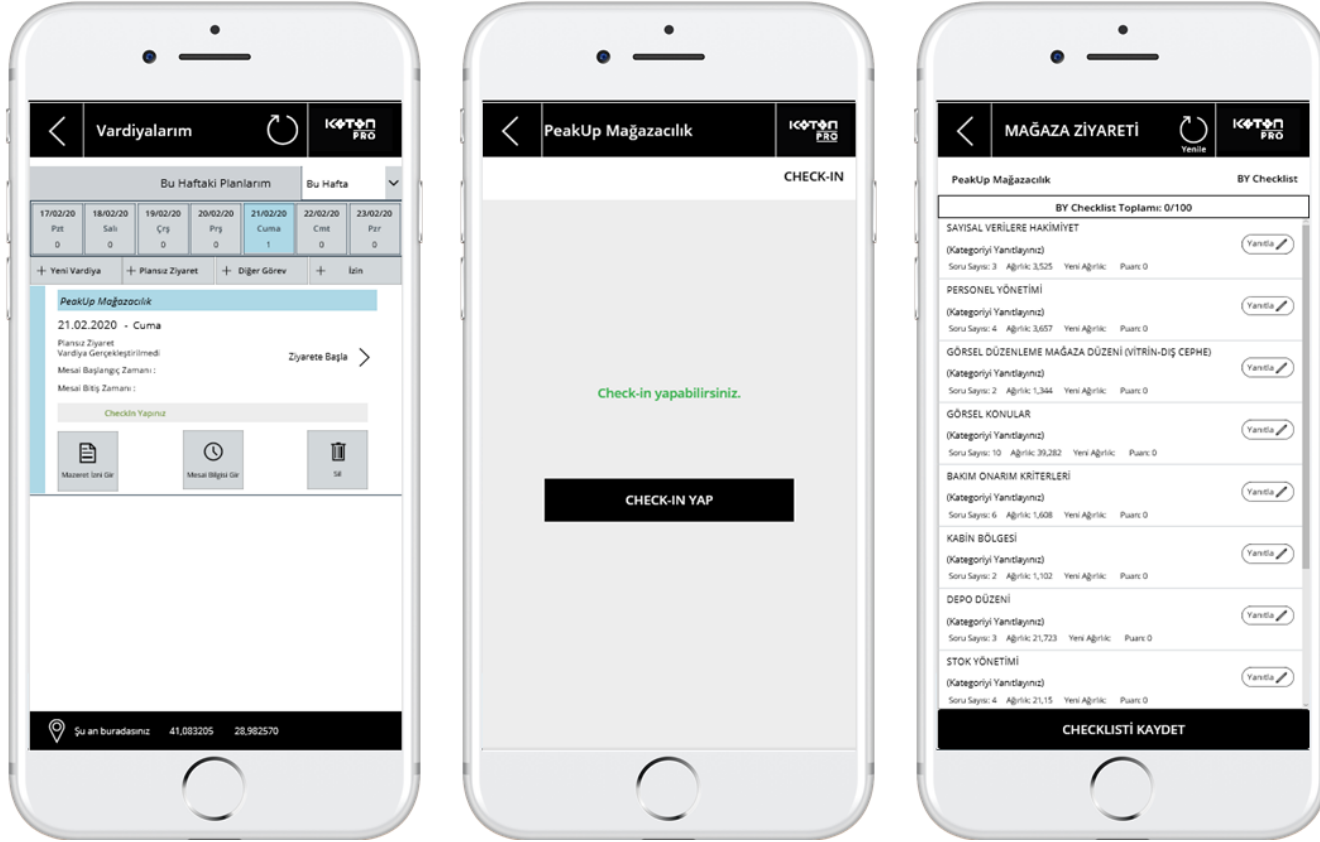

It is necessary to take more care of the personnel during the process of remote operation. In this process, on-premises activity/competition can be organized to increase employee loyalty, motivation and job efficiency.

It is a competition application where staff earn points from their sales and pictures taken during the sale by video calling with real customers through Teams.

At the end of the competition, prizes were distributed to the finalists who scored the most points.

Branch Audit

With this application, Koton store inspections are carried out.

The staff who are conducting the inspection plans a shift to the store. Check-in when you come to the store.

It scores the store by responding to audit criteria for the store. The audit results are reported to the Store with the PDF document. Check-out when leaving the store.

Staff shifts and Store Scores are tracked with Power BI reports.
