

CERTIPOINT IS KNOWN AS THE WORLD-LEADER IN PERFORMANCE-BASED CERTIFICATION EXAMS

We also we have a state-of-the art exam delivery technology, it's called Compass!

Compass is Certiport's state-of-the art exam delivery technology. Compass securely delivers over three million exams a year to schools, colleges, commercial learning centers, and individuals. It is a proven and reliable solution that makes Certiport exam deployment and administration secure, simple, and easy.

Single Solution, Multiple Modes Of Delivery

Compass can securely and safely deliver Certiport certification exams to wherever and whenever they are needed.

- **Local, On-Premise Configurations** Compass installs directly onto testing center computers or servers. With a locally-installed Compass client, testing events can be prepared ahead of time. Should an internet connection be lost during testing, point-in-time exams are saved for resumption with connectivity.
- **Remote Exams, COVID-19 Solution** Compass remote exam technology enables delivery via the cloud to any compatible device. Chat and shared-screen technology allow teachers to provide classroom-like assistance. Exam delivery is not dependent upon homogenous hardware configurations and updated local clients, freeing administrators from local hardware restrictions and maintenance.
- **Controlled Environments** Exams can be easily and securely delivery to controlled environments. An excellent solution for correctional institutions and remote facilities.

Available in multiple languages

Compass is available in multiple languages, making it a truly global exam delivery solution. There are currently 27 language options, and the list continues to grow.

The Compass for **Windows UI** is available in the following languages:
