

# Communicate safely with FraudSnap – real-time email fraud detection powered by Azure

Email fraud is a leading cause of data breaches, malware distribution, intellectual property theft, and more. According to the US Federal Bureau of Investigation (FBI), email scams cost businesses more than \$1.7B in 2019. To reduce your risk of email fraud, eliminate the threat before employee contact occurs.

## High-performance fraud detection

FraudSnap helps you process data directly from the user interface or a secure email server. Delivered using Microsoft Azure infrastructure, this high-performance, managed email fraud detection service streamlines the adoption, integration, and scale of your fraud detection.

**Falsified emails are involved in 56% of fraud.  
Tired of fighting email fraud? Try FraudSnap!**

### Comprehensive, custom fraud detection

- Tailors fraud detection to the needs of your business using customizable rules
- Detects a wide range of fraud types, including roaming, bypass, high-usage, pre-paid, and subscription
- Reduces false positives through advanced data analysis

### Advanced insight and access control

- Sends automated notifications using email, Slack, and Skype
- Offers full control over when and how you want to be notified—and lets you customize by user
- Enables flexible insight by fraud type or pattern
- Customizable AI-based, self-learning “Focus” inbox

### Email processing and protection from Day One

- FraudSnap offers a turn-key solution, ready for use right out of the box.
- Delivers strong baseline protection using prebuilt rules and your processed data.
- Refines and improves protection as your data evolves.
