TEAM PRODUCTIVITY

What you can accomplish

Boost customer OTD by identifying the engine's critical path & aligning the maintenance network with it

Ensure material coverage at the kitting gate by proactively addressing shortages and enhancing supply chain visibility

Improve throughput by streamlining repair planning under material & capacity constraints

Make strategic resource allocation decisions by effectively prioritizing between OEM & MRO needs

They trust us

> " Thanks to Pelico, we discovered that we'll be short for 100 compressors that would've blocked customer orders worth $15M.

PELICO 's MRO Solution

Data Synchronization

Synchronize MRO operations data to ensure the **right parts are at the kitting gate on time,** while proactively identifying the **critical path** using a comprehensive GANTT chart.

Bottleneck Anticipation

Drill down into an **engine's multi-level BOM** to gain complete visibility on blockers (such as part shortages, quality issues, late repairs, or subcontractor delays) and uncover their **root cause.**

Intelligent Assistance

Synchronize MRO operations data to ensure the **right parts are at the kitting gate on time,** while proactively identifying the **critical path** using a comprehensive GANTT chart.

Cross-team Collaboration

Enable **real-time and contextual collaboration** across gates and functions in one platform to take coordinated actions, creating an **accelerated feedback** loop that drives **informed decision-making**.
