

# Don't waste your time, use TiM!

TiM makes the mandatory dreaded activity of time tracking simple. So simple time tracking is no longer a chore we try to avoid. TiM permits the timekeeper to capture and record virtually all their time and submit it without hassle. As a result, the time record is efficient and accurate, delighting the timekeeper, manager, and client.

## What customers are saying:

*"TiM has been a game changer for me. I went from manually reviewing every email and call one-by-one to drag and dropping meeting from one calendar to another. This feature alone has saved me a tremendous amount of time and headaches."*

*– Patrick Hurtubise, Senior Technical Consultant, Thinkmax*

## WHAT IS TiM?

TiM works into the one application on your desktop that runs every day all day: Microsoft Outlook! We plan our day with the Microsoft Outlook calendar, so why not use it to record our day? Create a time entry with two mouse clicks or "drag and drop" from another calendar. Additionally, TiM tracks our email, application, and phone usage to help us capture our entire professional day. TiM also integrates with your favorite Microsoft Dynamics 365 solution. Simple, easy, and without timesheets!

TiM is more than software. TiM is also a methodology. Time is all a knowledge-based company has to sell, and we generally do a poor job of recording it; this results in individual and company under-performance. TiM directly addresses this issue by simplifying the process with a proven methodology plus tools to make our professional day better.

# Why TiM?

## Timesheets don't work!

We do not plan our day like a timesheet, so using the grid to record our day just doesn't fit. That is why time tracking is such a chore, and people end up losing valuable time capture and related billing. Most people perceive time in boxes or other shapes that contain past events or future to-dos. That is why TiM works, and timesheets don't. TiM uses the Outlook Calendar and event boxes to capture and record our time.

## Anywhere. Anytime

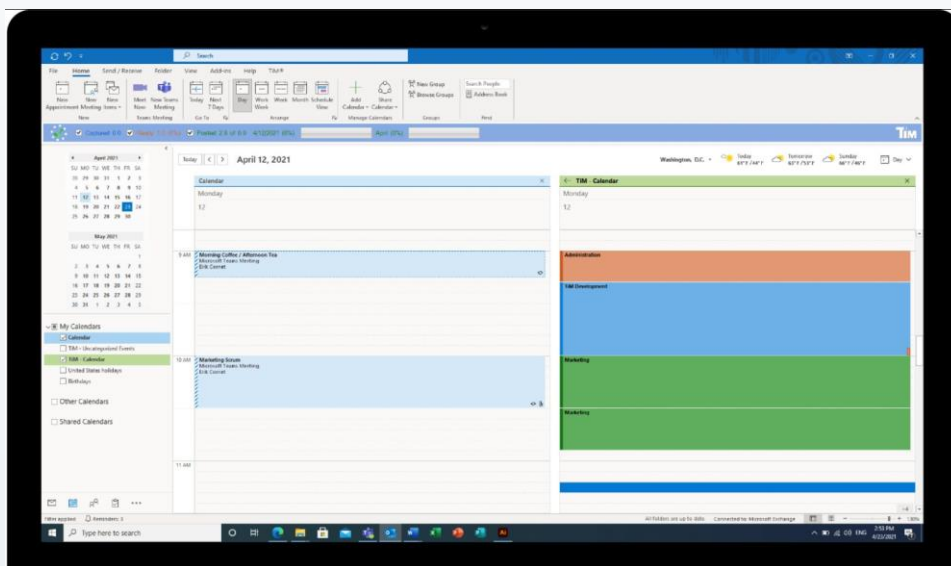

Today we work from anywhere, anytime and hop from Teams meeting to Teams meeting while responding to email, on top of getting our work done. How can we keep track of what we are doing and for whom we are doing it? We need help! TiM is that help! TiM helps you understand where your day went and organizes it into a clear calendar picture that submits directly to Microsoft Dynamics 365 F&O or Business Central.

## Time tracking aligned with how we work!

Too much going on to effectively track what we do. TiM makes it simple and fun!

Yes, Time tracking can be simple and fun!

"I look forward to doing my time, and that is crazy. It is fun and enjoyable, and I never thought I would mention these words in the same sentence. TiM should be at all companies." – Dynamics Consultant and TiM User.

Microsoft Integration!

Microsoft  
Dynamics

## Key points:

### Easy & Familiar

Users enjoy using TiM and getting their time done! Companies enjoy the TiM effect of greater utilization, not chasing employees for their time, and greater profits!

### Clear & Justifiable

TiM creates time entries that are clear and detailed that provide greater transparency to clients on how we spent our time on their projects. This leads to less invoice disputes.

### Generous Partner Program

The TiM Partner Program provides a reoccurring revenue model and internal use rights.

### Talent

Extend your virtual team with TiM. Easily on-board subcontractors and receive direct time submissions without having to grant access to your Dynamics system.

### Marketing

Enjoy market awareness and lead referral from TiM marketing campaigns.
