

# External Sharing Risk Assessment – 2 Weeks

---

Gain clear visibility into guest access and external sharing across Microsoft Teams, SharePoint, and OneDrive to reduce data exposure risks

# Why This Matters?

Collaboration Shouldn't Come at the Cost of Security

External sharing can unintentionally expose sensitive information

Over-permissioned guests may retain long-term access

Inconsistent policies create hidden compliance risks

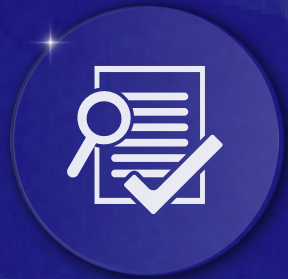

Lack of visibility makes it hard to control who sees what

# What We'll Deliver?

A Focused Assessment of External Access Risks

Analysis of external  
users, permissions &  
collaboration patterns

Evaluation of  
policies & governance  
controls

Review of current  
guest access &  
sharing configurations

Identification of over-  
shared sites, files &  
Teams channels

Clear  
recommendations  
to tighten &  
standardize access

# What You'll Walk Away With?

Visibility and Control Over External Collaboration

- ✓ Detailed understanding of external sharing risks
- ✓ Prioritized remediation plan to reduce exposure
- ✓ Improved governance for guest access and sharing
- ✓ Practical steps to secure Teams and SharePoint environments

# Collaborate Securely- Without the Risk

Enable safe external collaboration while protecting your data.
