Microsoft 365 is the most accepted and trusted cloud data-host service for enterprises.

In the new era of cloud transformation and rising security incidents, Microsoft 365 is the most accepted and trusted cloud data-host service for enterprises. For the same reason, it is the highly targeted cloud platform for the threat actors as well.

" Penthara Technologies is a trustworthy technology partner who always delivers work with exceptional quality and craftsmanship. Their ability to implement solutions to complex problems with ease sets them apart from the rest. "

TIM NUGIEL ·
Enterprise Data & Integration,
Evercore

" During my time working with Penthara they have been dependable, provided quality support, industry standard best practices for development and successfully developed products and services that helped evolve my organisation's technology and collaboration services. "

MICHAEL GONZALEZ ·
Sr. Director, IT Data & Analytics,
Syneos Health

Report presentation

Assessment Kickoff & technical setup

Report preparation

Our Deliverables

At the completion of the engagement, Penthara's team will provide a detailed report that includes:

- ✓ A snapshot of the existing Microsoft 365 tenant security configuration.

- ✓ Prioritized & basic recommendations for further hardening the security posture of the Microsoft 365 tenant.

- ✓ Practical recommendations for enhancing visibility and detection.

- ✓ Specific Microsoft 365 security best practices to align with current configurations and operational processes.

Suitable for:

An existing Microsoft 365 customer

- ✓ With Microsoft 365 E3 or E5 licenses.

- ✓ Looking for regulatory or security compliance

- ✓ Who wants to reassure surrounding security.

- ✓ Looking to attain a security accreditation.

Why Penthara
