Copilot Studio
Jumpstart

Copilot Studio is an end-to-end conversational AI platform for extending Microsoft Copilot or building your own copilot with generative AI and large language models. Our Copilot Studio Jumpstart allows organizations to quickly rollout start creating their own copilot experiences for their audiences in a streamlined, well-governed approach.

Activities:

- Discovery and Capabilities Definition

- Solution Design with Security, Monitoring and Governance Recommendations

- Azure AI Landing Zone Design

- Environment Setup

- Copilot Build

- Transition and Adoption Recommendations

Deliverables
- Architecture Outline

- Product Backlog

- Solution Design Document

- Copilot Solution

- Copilot Roadmap

Starting at: 8 Weeks
