

Copilot for M365 Readiness

The M365 Technical Readiness engagement is the foundation for a successful Copilot for M365 Pilot implementation. We will assess readiness by providing risks, blockers, next steps, and best practices for data governance, security and compliance

Readiness Report

Data Governance & Information Architecture Strategy

2 Weeks | Starting at \$20K

Plan

Review minimum technical requirement and how you can prepare for enablement. Learn about best practices for permissions, security, privacy, compliance, and data residency to help your organization get prepared.

Prepare

Discuss and strategize good content management and governance practices in preparation for Copilot. Prevent content oversharing and poor end user experience by having a data governance and information architecture strategy.

Review

Review the risks related to permissions, security, access, and data privacy and have a clear understanding for immediate next steps and plan for pilot based on our findings
