

Azure Application Modernization Assessment

Assess Your Applications for Cloud Readiness

Customer and internal stakeholder demands are increasing every day, but aging systems and legacy applications are unable to take full advantage of today's customer-centric cloud technologies. If you've yet to begin modernizing with cloud, you risk losing customers and being left behind.

Cloud modernization is a critical component of a successful digital transformation. Many organizations are making the move to Microsoft Azure specifically, with its ability to provide infrastructure and a platform for development in the cloud to meet whatever needs a business may have.

Our Azure Application Modernization Assessment is a consultative engagement where we work closely with you to select the right candidates from your portfolio to move to the cloud. We analyze costs, and then create and execute upon a roadmap to modernize your applications. We walk through the process step-by-step from the planning to the execution of the roadmap, before providing you with a plan for the future to make you an organization that can innovate in the cloud.

What's Included

- **Application modernization planning:**
Reference architecture, automation recommendations, cost forecasting, and platform readiness
- **Portfolio analysis:**
Analysis of 1-5 applications to provide recommendation on modernization and migration
- **Cloud strategy:**
Validation of your cloud ecosystems and recommendations for improvement

Deliverables

- An executive summary of engagement of engagement scope, customer objectives, and recommendations for next steps
- Azure service and architecture design recommendations for a production-ready PaaS environment
- Migration/modernization plan
- Cloud adoption framework gap analysis
- Proposal for additional services to modernize
