setup with
PetaBytz

Cost Transparency

Compliance and Security

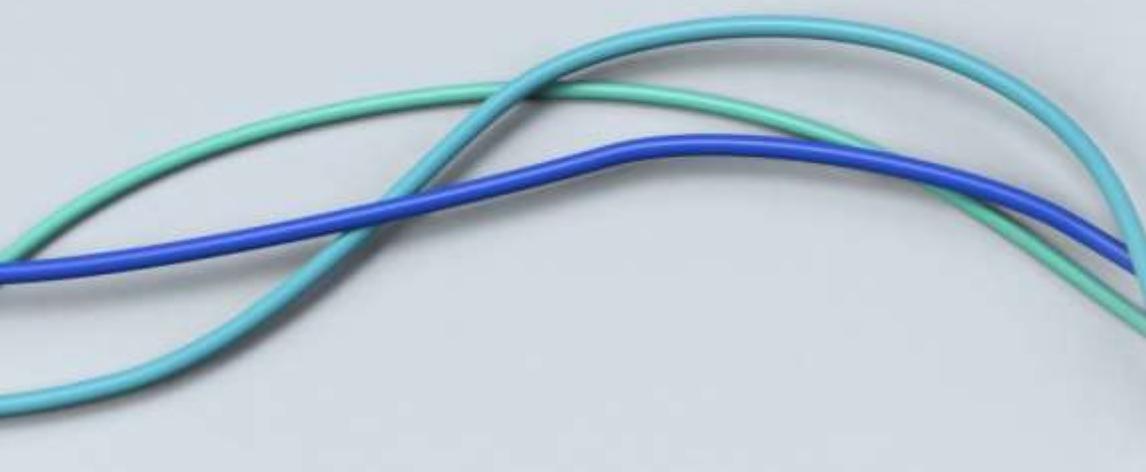

Roles and Responsibility

Correct Path to the problems with perfect
design considerations

Upscaling when it is required

PetaBytz Create the value for Cloud-ready environments

- Adaptable to grow and expand
- Aligned to Business Priorities
- Cloud Design Considerations
- Compliant
- Ready For Cloud Applications
- Adapted for cloud operating model

PetaBytz Recommendations

- Leverage best practices in Cloud Adoption Framework to help your teams establish and prepare the Azure environment. These include guidance in the areas of:
 - Compute
 - Storage
 - Networking
 - Identity and Access Control
 - Databases
 - Cost Management

Deliverables

1. Migration Recommendation Document

2. Server Inventory Report

3. Azure VM Migration Report

4. Migration Plan

PetaBytz Agenda

Week 1:

- Kick-Off and Installation of Azure Migrate Assessment Tool
- Meetings to understand (Networking, Security, Infrastructure, Operations, Risk, & Change Management)

Week 2:

- Cloud readiness reports of analyzed infrastructure from Azure migrate tool
- Design target cloud architecture and infrastructure report
- Recommendations and Roadmap final report.
