

# UNSACTIONED PRESENCE

AVIATION CLIENT, R10,000,000 – 3 Months

Aviation Client

## Securing Aviation Business:

Aviation Client, R10,000,000 – 3 Months,

Aviation is a critical service which resides on critical infrastructure and any point of compromise is required to be addressed in prompt manner as the impact thereof could be devastating, loss of life.

Establishing a continuous Risk-View and business driving security platform was key and Phakamo Tech enabled that for us.

## Challenges:

The Aviation client reached to Phakamo Tech due to the following:

- An increase whaling attacks to executives.
- Users experienced abnormal behavior in their operations.
- Though they invested in a SIEM there lack of skills to identify indicator of compromise was non-existent.
- The need to provide the board with cybersecurity confidence.

## Solution:

Deployment of the EMS Suite, more specifically:

- AIP and MCAS integration for data loss prevention.
- Conditional Access to strengthen secure identity.
- Microsoft Security Score to drive a Risk perspective view.
- All Advanced Threat Protection tools to automate detection and response, leveraging an expert team of analyst.

## Service Value:

Leveraging Phakamo's Incident Response & Threat Hunting services, the client benefited on the team's expertise who:

- Provided a view into systemic risks and exposures
- Identified security hygiene issues
- Provided recommendations for strengthening your organization's resiliency against future incidents leveraging Azure & M365 Security
- Crafted an Information and Cyber Security strategy and roadmap
