

Modern Management Accelerator

Many organisations are adopting modern management strategies to manage their devices, users, and apps with a cloud-based approach.

This approach streamlines the device management and onboarding processes that go into keeping users and devices secure and running smoothly. As a result, organisations are exposed to far less risk, users work more productively without interruption from anywhere, and IT teams are free to focus on higher-value projects.

The benefits of a modern management approach

- ▶ Reduced resource and time to get devices to users
- ▶ Confidence that your devices are secure and up to date
- ▶ Assurance that your devices are configured to an enterprise security standard
- ▶ Access to the data and reporting you need to adhere to internal and external regulatory requirements
- ▶ User self-service access to applications
- ▶ Simplified management and distribution of content across estates with a cloud-first approach

Our Modern Management Accelerator service

Our Modern Management Accelerator delivers a secure baseline, formed from our expertise and experience of known good and real-world device management practices, focusing on device compliance, configuration, endpoint security and mobile application management.

These device management profiles are created within the NCSC framework, enabling you to align your device estate to your current and future modern management needs, whilst improving and maintaining your security posture.

The engagement is structured across three phases:

- ▶ Configuration Planning Workshop
- ▶ Configuration and design documentation
- ▶ Modern Management Accelerator implementation

Partnering with Microsoft – an industry leader

Microsoft is recognised as an industry leader in the 2022 Gartner® Magic Quadrant™ for Unified Endpoint Management Tools. The accreditation recognises three reasons why Microsoft Intune is a cost-effective and dependable solution for enterprise device management:

1. As a native Microsoft solution, it provides deep integration with Microsoft 365 and Microsoft Azure to improve employee and administrator experience by seamlessly integrating management, identity, and security
2. It delivers full control for cloud migrations. The improvements made in tenant attach and hybrid Microsoft Azure Active Directory give you many choices in how you co-manage your devices, putting you firmly in control
3. The ongoing investments deliver improved IT administrator frontline worker experiences, including integrations with Azure Virtual Desktop, Windows 365, and Microsoft Defender for Endpoint

Transform your modern workplace now

Arrange your free consultation with our modern workplace specialists today to increase productivity, secure your device estate, and get a greater return on investment.
