

Protecting our future: sustainability

Carbon accounting solutions

The UK government has committed to the United Nations' Sustainable Development Goals (SDGs) and is encouraging local government and public sector organisations to support delivery against two thirds of the targets. As your services impact on both the environmental and social challenges faced by the UK, you have a crucial role in helping to achieve these targets by 2030.

To support these goals, you must change behaviours within your organisation, and technology and data solutions are vital in helping you deliver this.

Data insights

What gets measured gets managed, but to do so effectively, you need the right information. This is particularly true as public sector organisations transition to net zero and strive to deliver long-term carbon negative targets.

To address the climate crisis, we all must play our part in reducing carbon emissions by consuming less energy and using energy more efficiently. This may sound simple, but making these changes can be challenging, especially without the right data to back them up.

Investing in data insights will support you to secure internal and external buy-in with a greater understanding of people and places, and their impact on the environment. Our series of carbon accounting solutions enable you to record and report data against your sustainability objectives, track reduction and replacement, and provide additional value from your Microsoft licensing.

Carbon accounting with Power Apps

Set up a carbon accounting system bespoke to your organisation's needs.

Our easy-to-use Power App and BI dashboard enables you to record the emissions that are important to you, report by scope, and track reduction against targets, while tracking all positive replacement actions.

What to expect and who should attend?

Activity	Attendees	Duration
Envisioning demonstration: showcasing the carbon accounting technology	Senior leadership and key stakeholders	1 hour
Discovery workshop: understanding your data capture and configuration requirements	Senior leadership and key stakeholders	Half day
Recording: mentored Power App build workshop	IT service and key stakeholders	1 day
Reporting: mentored BI dashboard build workshop	IT service and key stakeholders	1 day
End user training	End users	1 hour per session
Next steps workshop: strategy, green technology, and governance	Senior leadership and key stakeholders	1 hour

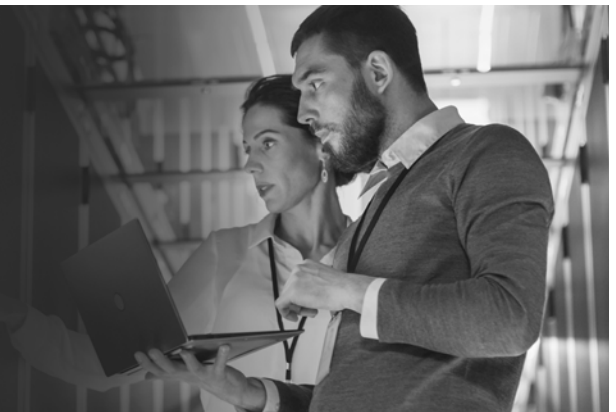

The benefits

- ▶ Bespoke carbon accounting system to meet your organisation's carbon goals
- ▶ Ability to record and report data for transparency and engagement
- ▶ Understand your carbon footprint and key contributing services to make positive changes
- ▶ Track carbon targets and performance to show progress and reductions
- ▶ Visibility of offsetting and replacement programmes against actual carbon emissions
- ▶ Control of your carbon accounting system to get the most value from it

Why Phoenix?

We are the public sector's partner of choice with over 30 years' experience supporting central and local government, education, NHS, police and emergency services, housing association, and charity organisations with innovative IT solutions.

We understand the challenges facing the UK's public sector and work with you to reach your sustainability goals.

Accelerate your sustainability journey now

Chat to one of our sustainability specialists today to find out how our carbon accounting solutions support your organisation to reach its sustainability goals faster.
