

Protecting our future: sustainability **Environmental governance and compliance**

The UK government has committed to the United Nations' Sustainable Development Goals (SDGs) and is encouraging local government and public sector organisations to support delivery against two thirds of the targets. As your services impact on both the environmental and social challenges faced by the UK, you have a crucial role in helping to achieve these targets by 2030.

To support these goals, you must change behaviours within your organisation, and technology and data solutions are vital in helping you deliver this.

Environmental compliance

Sustainability isn't a tick box exercise and it's becoming more important than ever for public sector organisations to be seen doing their part to protect our environment. Because of this, robust environmental governance and the management of compliance and risks are key to your overall sustainability strategy.

The ISO 14001 framework is the international standard for environmental management systems, helping organisations to reduce their environmental impact by following requirements. Alongside ensuring legal compliance with environmental legislation, ISO 14001 supports all organisations to reduce waste, improve resource efficiency, and reduce the cost of waste management.

What to expect and who should attend?

Our environmental governance and compliance programme is interactive and follows ISO 14001 methodology to address environmental governance in your organisation. Certified ISO 14001 in-house consultants will help you understand how to manage environmental sustainability across all areas of your organisation, including:

- ▶ **Governance and risk:** align or build policies and processes
- ▶ **Strategy:** align technologies to reduce your carbon footprint
- ▶ **Metrics:** build your environmental management system
- ▶ **Audit:** support for Internal Audits

This approach will empower your organisation to:

- ▶ Support sustainable urban development and mobility
- ▶ Innovate overpopulation and waste management
- ▶ Make your carbon footprint neutral, then negative
- ▶ Support energy transitions and renewables
- ▶ Protect biodiversity
- ▶ Achieve ISO 14001 certification

Based on your organisation's specific needs, we will assist you to build a bespoke package from the following workshops:

Workshop	Duration
GREC envisioning session	1 hour
Environmental governance gap analysis	3-5 days
Environmental risk management consultation	3-5 days
Environmental incident response plan consultation	5 days
Environmental metrics, reporting, and improvement plans	3-5 days
Environmental policies and procedures	tbc
Environmental audits with remediation action plans	tbc
Next steps workshop: carbon accounting, strategy, and green technology	90 minutes

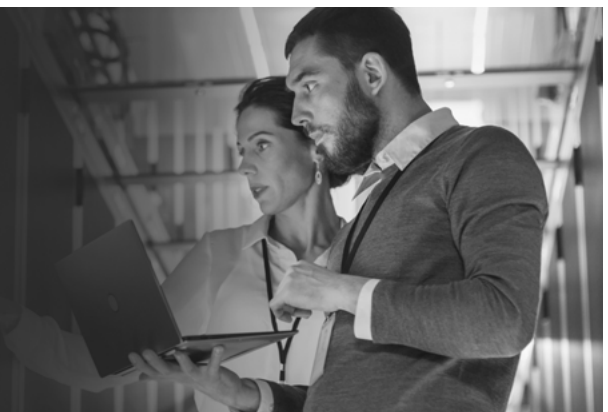

The benefits

- ▶ Align services to delivery of your sustainability objectives
- ▶ Gain robust environmental governance of your organisation
- ▶ A fully documented environmental framework and toolkit

Why Phoenix?

We are the public sector's partner of choice with over 30 years' experience supporting central and local government, education, NHS, police and emergency services, housing association, and charity organisations with innovative IT solutions.

We understand the challenges facing the UK's public sector and work with you to reach your sustainability goals.

Accelerate your sustainability journey now

Chat to one of our sustainability specialists today to find out how our environmental governance and compliance workshops support your organisation to reach its sustainability goals faster.
