

HELLO
I AM

pienso

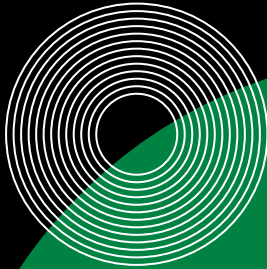

ALLOW ME TO INTRODUCE MYSELF...

I am Pienso, your no-code / low-code interactive deep learning platform for text analysis.

Deep learning is often seen as difficult.

But with me, it's **easier than ever before.**

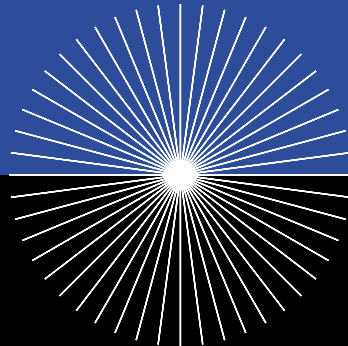

Creating a deep learning model from scratch takes advanced programming know-how. This expertise is expensive, and supersedes the knowledge that matters most: familiarity with your data.

I am Pienso.

I'M
DIFFERENT.

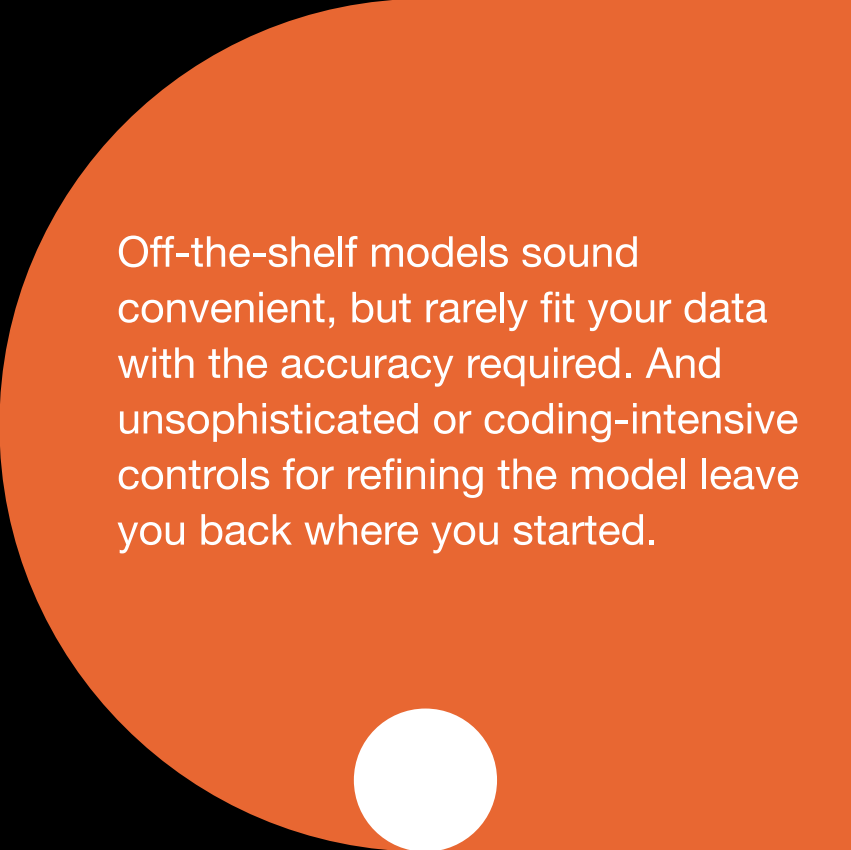

Labeling your own training data is slow and expensive. Outsourcing it to "crowdworkers" can be fast and cheap, but compromises on expertise and accuracy. And either approach leaves you stuck with a fixed taxonomy that's hard to evolve.

I am Pienso.

I'M

DIFFERENT.

Off-the-shelf models sound convenient, but rarely fit your data with the accuracy required. And unsophisticated or coding-intensive controls for refining the model leave you back where you started.

I am Pienso.

I'M
DIFFERENT.

Other deep learning platforms force you to choose between expensive, slow and accurate, or cheap, efficient and inaccurate. But not Pienso. Accelerate clarity without seeing a single line of code. **Keep the data topic expert in the driver's seat so your data models reflect the nuance in your data.**

Tag, create, tune, tweak and pay only for the models you deploy — in the leading clouds, on premise or hybrid.

I am Pienso.

**IT'S
NICE TO
MEET YOU.**

I am Pienso.

**AND THIS IS
WHO I WORK WITH**

GRAPHCORE

I work in the public sector too. Ask me who I work with and how.
