

Piik GPX for Retailers

Your business has been generating data since the doors opened. It's time you used that data to grow your business profitably.

Piik GPX seamlessly integrates data from systems restaurants already use, continuously recognizes patterns, and provides AI-powered actionable insights, in real-time, that **increase sales and productivity, and optimize inventory costs.**

Piik GPX is an AI-powered Analytics-as-a-Service for Retailers

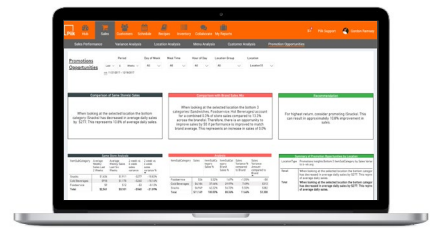

Unified Data

seamlessly bring together data from multiple systems (internal / external) in one place

Interactive Analytics

holistic, visually interactive, analyses of sales and inventory costs

Actionable Insights

AI-powered sales forecasts and recommendations to improve sales and optimize inventory costs

Solution benefits...Sample questions that Piik GPX answers

What promotions should I run? When? For which customers?

Which categories make more money? How do I reduce inventory costs?

How can I improve my low performing locations?

What sales can I expect for each category and how much to order when to optimize inventory?
