

Advanced multimedia redaction

Transform compliance timescales with advanced automation for Public Safety

Secure Redact is the optimum solution for advanced automated redaction. Easily integrated into your DEMS platform or deployed as a stand alone solution, Secure Redact brings world-class automation together with specialist and intuitive user tools for review and editing of video and audio for redaction. Secure Redact is proven to reduce video redaction time for evidence presentation and FOIA requests, speed up operational efficiency and free up valuable time to focus on other critical projects.

Upload video

CCTV, Body-worn and more.

Automatic tracking of all PII

over 99% of PII identified for redaction based around a frame-by-frame rate.

Review and unredact

Unredact individuals with one tick-box and keep everyone else blurred.

Redact and download

To your Microsoft Azure tenant.

Key Enterprise features

- ✓ **Automatic** detection for redaction of faces, heads and/or license plates.
- ✓ **Intelligent tracking and editing** for redaction of user-identified objects.
- ✓ Blur or **Spotlight** specific areas of the video.
- ✓ Selective **audio** redaction with **audio-to-text transcription**.
- ✓ Single sign-on support, deployed into private Microsoft Azure tenant.
- ✓ **Large volume video processing for multiple users** across sites and teams for collaborative projects.
- ✓ **Admin management** capabilities, reporting, invoicing and support.

Secure Redact: approved for private Azure and Government Cloud deployment

World-leading accuracy
Over 99% of PII automatically identified for redaction.

Usage-based licensing
An annual fee secures a volume of video redaction hours, shareable across all teams.

Fast editing, even faster redaction
Redact a 10-minute CCTV video in 10 minutes with Secure Redact*.

Integrated into various DEMS and VMS platforms
Accessible via SaaS, APIs or customer cloud (including your private Microsoft Azure tenant).

Save time, improve efficiency, stay compliant

Significantly reduces manual resources

Information Security teams can fulfil all redaction needs within constrictive time frames.

Keep operations data compliant

Quickly respond to FOIA or other data requests.

Easily share anonymised video

With 3rd parties for incidents, training or with the public/media.

Deliver trust and confidence

Responsibly manage video for transparency and proactive community engagement.

To redact 10 minutes of CCTV for a FOIA request, it would take:

8 hours
with video editing software

10 MINUTES
with Secure Redact

*The scenario assumes a medium-busy CCTV scene + video editing carried out by a Security Manager for 8 hours a day using traditional video editing software

Integrate Secure Redact directly into your existing video workflow

With open APIs, Secure Redact can be integrated into existing adjacent video management platforms.

Pimloc have existing partnerships and integrations with Milestone Systems, Eagle Eye Networks, NICE and more. Pimloc is open to further integrations if required.

Pimloc's Secure Redact can be deployed into any private Microsoft Azure tenant, with partnership support from Microsoft – to facilitate secure video data processing and speed up operational efficiency.

About Pimloc

Pimloc is providing the privacy layer for mass-scale video usage – for better security and transparency for all.

Pimloc's artificial intelligence technology enables private and public organisations to responsibly manage security video from CCTV, body-worn and dash cameras by protecting and redacting any personal data, such as faces or identifying information. This allows companies to efficiently manage personal data in video at scale, enabling them to comply with legislation and helping maintain trust with customers and the public.
